Issues in Philosophical Counseling Peter B. Raabe, 2002-06-30 Raabe examines some of the most perplexing problems a client may present to a counselor and how a philosopher would deal with them He provides a detailed philosophical discussion as well as illustrative case studies of some of the most important issues encountered in any counseling practice The first six chapters discuss philosophical counseling in general terms while the following 15 chapters deal with specific life issues such as the differences between how men and women communicate and how this is relevant to a counseling discussion the role of medication in therapy the concept of normalcy the meaning of life the motivation behind suicide dream interpretation and religious beliefs An important resource for professionals students and scholars involved with philosophical counseling and applied practical philosophy [Philosophy in Philosophical Counseling](#) Ora Gruengard, 2023-07-25 *Philosophy in Philosophical Counseling Unasked Questions Open Answers* offers a base for criticizing approaches to philosophical counseling that fail to be philosophical or relevant to the counselees concerns It analyses the impact of tacit unexamined philosophical assumptions and examines their influence on the search for solutions while explaining how such assumptions may obstruct that search Ora Gruengard argues that conversations in which the participants disagree with each

other are the adequate context for calling tacit assumptions into question and exploring alternatives Her research shows how philosophical assumptions change in informal conversations and illuminates their important role in education religious guidance and psychological treatments Nevertheless philosophical issues are best dealt with in explicit philosophical dialogues in which counselees are respected as philosophical partners who are encouraged to think critically and make their own judgments This book addresses counselors dilemmas by presenting examples of hypothetical counseling conversations and true sessions with real people Gruengard also discusses what kind of philosophical knowledge and expertise is necessary for doing the job adequately *Philosophy, Counseling, and Psychotherapy* Elliot D. Cohen, Samuel Zinaich, 2013-07-16 Can philosophy help ordinary people confront their personal or interpersonal problems of living Can it help a couple whose marriage is on the rocks or someone going through a midlife crisis or someone depressed over the death of a significant other or who suffers from anxiety about making a life change These and many other behavioral and emotional problems are ordinarily referred to psychologists psychiatrists clinical social workers or other mental health specialists Less mainstream is the possibility of consulting a philosophical counselor or practitioner Yet there is presently a steadily increasing world wide movement among individuals with postgraduate credentials in philosophy to harness their philosophical training and skills in helping others to address their life problems But is this channeling of philosophy outside the classroom into the arena of life a good idea Are philosophers as such competent to handle all or any of the myriad emotional and behavioral problems that arise in the context of life or should these matters best be left to those trained in psychological counseling or psychotherapy Through a diverse and contrasting set of readings authored by prominent philosophers philosophical counselors and psychologists this volume carefully explores the nature of philosophical counseling or practice and its relationship to psychological counseling and psychotherapy Digging deeply into this relational question this volume aims to spark more rational reflection and greater sensitivity and openness to the potential contributions of philosophical practice It is accordingly intended for students teachers scholars and practitioners of philosophy counseling or psychotherapy as well as those interested in knowing more about philosophical counseling or practice **Philosophy's Role in Counseling and Psychotherapy** Peter Raabe, 2013-11-26 In *Philosophy's Role in Counseling and Psychotherapy* Peter Raabe argues that philosophy is an effective method in treating mental illness Calling for a paradigm shift away from the standard belief that the brain and mind are identical Raabe argues that so called mental illnesses such as depression and schizophrenia are not the actual causes of psychological misery Instead they are just labels for symptoms For example the word depression is merely a label attached to a collection of symptoms such as sadness hopelessness and low self esteem Raabe posits that distressing or painful life events can cause symptoms that are often clinically labeled as the mental illness of depression The suffering brought on by painful life events can often be alleviated with helpful discussions and without resorting to medications Because philosophy is the foremost form of discussion it means that the suffering that is labeled mental illness

can be treated and even cured with philosophy Raabe ultimately concludes that philosophy is beneficial in three ways it can prevent the onset of a so called mental illness in the person who studies it it can be used to help individuals suffering from the distress that is labeled mental illness and it will enhance the competence of the counselor or therapist who practices it

2 A GUIDED HISTORICAL TOUR As Scott LaBarge points out Plato's dialogues can be viewed as an extended treatment of the concept of moral expertise so it is fitting to begin the volume with an examination of Socrates and Moral Expertise Given Socrates' protestations the Oracle at Delphi notwithstanding that he knows nothing LaBarge observes that it would be interesting to determine both what a Socratic theory of moral expertise might be and whether Socrates qualified as such an expert Plato's model of moral expertise is what LaBarge calls demonstrable expertise which is concerned mainly with the ability to attain a goal and to explain how one did it The problem with this account is that when one tries to solve the various problems in the model for example allowing that moral expertise is not an all or nothing skill then one is immediately faced with the credentials problem As LaBarge puts it
