Mode selector switch

The user can change the operating mode via the connection manager. The connection manager is a view that is called by means of the mode selector switch on the smartPAD.

The mode selector switch may be one of the following variants:

- With key
It is only possible to change operating mode if the key is inserted.
- Without key

WARNING

If the smartPAD is fitted with a switch without a key: An additional device must be present to ensure that the relevant functions cannot be executed by all users, but only by a restricted group of people. The device itself must not trigger motions of the industrial robot or other hazards. If this device is missing, death or severe injuries may result.

The system integrator is responsible for ensuring that such a device is implemented.

5.5.4 “Operator safety” signal

The “operator safety” signal is used for monitoring physical safeguards, e.g. safety gates. Automatic operation is not possible without this signal. In the event of a loss of signal during automatic operation (e.g. safety gate is opened), the manipulator stops with a safety stop 1.

Operator safety is not active in modes T1 (Manual Reduced Velocity) and T2 (Manual High Velocity).

Kuka Operator Manual:

Advanced Surface Enhancement Sho Itoh, Shashwat Shukla, 2019-08-30 This book presents the proceedings of the first INCASE conference organised by ARTC at A STAR Singapore It provides a comprehensive review of recent advances in surface enhancement processes and strategies employed to assess their impact on materials properties and performance As cyber physical systems are becoming more and more relevant in manufacturing it focuses on assessing the readiness of current technologies for future transformations such as Industry 4 0 identifying the opportunities and challenges and exploring ways to address them Written by researchers practising engineering and industry experts the book bridges the gap between research and manufacturing promoting technology adoption in industry and innovative ideas to prepare it for the future

Intelligent Information and Database Systems Paweł Sitek, Marcin Pietranik, Marek Krótkiewicz, Chutimet Srinilta, 2020-03-03 This volume constitutes the refereed proceedings of the 12th Asian Conference on Intelligent Information and Database Systems ACIIDS 2020 held in Phuket Thailand in March 2020 The total of 50 full papers accepted for publication in these proceedings were carefully reviewed and selected from 180 submissions The papers are organized in the following topical sections advanced big data machine learning and data mining industry applications of intelligent methods and systems artificial intelligence optimization and databases in practical applications intelligent applications of internet of things recommendation and user centric applications of intelligent systems

Smart Trends in Computing and Communications Tomonobu Senjyu, Chakchai So-In, Amit Joshi, 2025-09-30 This book gathers high quality papers presented at the Ninth International Conference on Smart Trends in Computing and Communications SmartCom 2025 organised by Global Knowledge Research Foundation GR Foundation from 29 to 31 January 2025 in Pune India It covers state of the art and emerging topics in information computer communications and effective strategies for their use in engineering and managerial applications It also explores and discusses the latest technological advances in and future directions for information and knowledge computing and its applications

Computer-aided Technologies Razvan Udriou, 2016-12-07 The aim of this book is to present the latest applications trends and developments of computer aided technologies CAX Computer aided technologies are the core of product lifecycle management PLM and human lifecycle management HUM This book has seven chapters organized in two sections Computer Aided Technologies in Engineering and Computer Aided Technologies in Medicine The first section treats the different aspects of PLM including design simulations and analysis manufacturing production planning and quality assurance In the second part of the book are presented CAX applications in medicine focused on clinical decision diagnosis and biosensor design CAX plays a key role in a variety of engineering and medical applications bringing a lot of benefits in product life cycle extending and improving human life

Dynamics in Logistics Herbert Kotzab, Jürgen Pannek, Klaus-Dieter Thoben, 2015-12-21 This contributed volume brings together research papers presented at the 4th International Conference on Dynamics in Logistics held in Bremen Germany in February 2014 The conference

focused on the identification analysis and description of the dynamics of logistics processes and networks Topics covered range from the modeling and planning of processes to innovative methods like autonomous control and knowledge management to the latest technologies provided by radio frequency identification mobile communication and networking The growing dynamic poses wholly new challenges logistics processes and networks must be able to rapidly and flexibly adapt to constantly changing conditions The book primarily addresses the needs of researchers and practitioners from the field of logistics but will also be beneficial for graduate students

Robotic Safety Systems Justin Starr, Christopher Quick, 2024-11-14 This book reboots the conversation about all technologies relating to robot safety It covers key features of industry standards relevant government regulations hardware devices physical safeguards and vendor specific software implementations including FANUC's Dual Check Safety ABB's SafeMove and more Robotic Safety Systems An Applied Approach discusses some of the unique concerns associated with remote I/O and systems designed to be controlled over wide area networks including the internet It includes annotated example safety configurations and programs that can be customized and loaded and deployed on existing robots giving the reader tools to immediately apply the lessons learned in this text The text also provides best practices for using cutting edge systems such as cobots and mobile robotic arms with some autonomy systems that have advanced faster than the regulatory frameworks Included are real world examples from FANUC ABB Universal Robots and Kuka the most popular brands on the market Finally as an appendix to this text a case study demonstrating proper use of A3 RIA standards is included This will allow readers to make an informed decision prior to purchasing these expensive references This book is intended for post secondary classes at universities with specializations in robotics or robotic engineering It will also be useful for robot systems integrators design engineers consultants integration experts robot programmers

Advanced Materials, Mechanical and Structural Engineering Seung Hong, Junwon Seo, Kihoon Moon, 2016-04-14 In the last decades advanced materials and mechanics has become a hot topic in engineering Recent trends show that the application of nanotechnology and environmental science together with advanced materials and mechanics are playing an increasingly important role in engineering applications For catching up with this current trend this book

Advances in Manufacturing Technology XXXIII Mark Price, 2019-08-15 The development and management of technologies and operations are key to the success of all types of manufacturing business This book presents the proceedings of the 17th International Conference on Manufacturing Research ICMR 2019 held in Belfast UK on 10-12 September 2019 ICMR has been the UK's main manufacturing research conference for 34 years and an international conference since 2003 It brings together researchers academics and industrialists to share their vision knowledge and experience and discuss emerging trends and new challenges in manufacturing research The conference theme of ICMR2019 was smart manufacturing and the book includes the 82 papers presented at the conference representing an acceptance rate of 69% These have been divided into 13 parts which cover topics ranging from robot automation and machining processes additive

manufacturing composite manufacturing design methods to information management quality control production optimization and product lifecycle management Providing an overview of current trends and developments the book will be of interest to researchers and engineers in the relevant area of manufacturing processes design and production management **Recent**
