Linguistic And Translation Studies In Scientific Communication Linguistic Insights:

Linguistic and Translation Studies in Scientific Communication M. Lluïsa Gea Valor, Isabel García Izquierdo, María José Esteve, 2010 This volume offers a collection of papers which seek to provide further insights into the way scientific and technical knowledge is communicated i.e. written, transmitted and translated nowadays not only in the academic sphere but also in society as a whole. Language in science has traditionally been valued for prioritising objective propositional content; however, interpersonal and pragmatic dimensions as well as translation perspectives are worth exploring in order to better understand the mechanisms of specialised communication. Accordingly, the contributions in this volume cover topics of special interest to scholars and researchers in the fields of linguistics and translation, such as the popularisation and transmission of scientific knowledge via ICTs, terminology and corpus-based studies in scientific discourse, genres and discourse in scientific and technical communication, the history and evolution of scientific language and translation of scientific texts.

Systemic Functional Insights on Language and Linguistics Christian M.I.M. Matthiessen, Bo Wang, Yuanyi Ma, Isaac N. Mwinlaaru, 2022-04-05 This book features a collection of 10 interviews with Christian M.I.M. Matthiessen, who is a key figure in Systemic Functional Linguistics (SFL) and has collaborated closely with M.A.K. Halliday since the 1980s. As noted by Professor Chang Chenguang, Editor of the M.A.K. Halliday Library Functional Linguistics Series, this collection of interviews serves as an important reference for scholars and students of SFL. It provides a unique perspective on the theoretical development and future outlooks of SFL, as well as Matthiessen's own interpretations of the theory. It also enriches our understanding of SFL and is a very useful addition to the series. Written in an engaging dialogic format, the book paints a vivid picture of SFL thriving among the landscape of general linguistics and of SFL as an important tool now being applied in various areas.

Multidisciplinary Insights into Translation Studies Jozef Štefčík, 2025-03-24 The book explores translation theory, the translation industry's current state and potential future, and translation research and pedagogy. It delves into disruptive technologies, globalisation and changing market trends that are shaping translation studies. The book highlights significant advancements in the translation industry and translation training technology, particularly machine translation and artificial intelligence in practice, focusing on an interdisciplinary, human-based approach and its impact on the increased demand for translations. The book offers views on new opportunities for labour positions in the translation industry and training models that should be carried out to corresponding research. Moreover, the book emphasises the increasing demand for translation services in selected domains and niche industries. While acknowledging the potential disruptions brought by technological advancements, the ideas presented in the book underline the importance of adaptability and continuous learning for language professionals. It calls for the education system to embrace the challenges and equip future language professionals with the necessary skills to thrive in a changing landscape. The presented concepts aim to encourage readers to embrace technological advancements, human cooperation, specialisation in niche areas and actively

participate in professional networking to contribute significantly to the growth of the fast evolving language industry This book is intended for curricula designers at universities academics and students in the fields of translatology philology linguistics humanities languages and cultural studies and trainers of translation and interpreting This book is also useful for lexicographers and terminographers and freelancers in LSP

The Interface between Scientific and Technical Translation Studies and Cognitive Linguistics Ralph Krüger, 2015-04-17 Scientific and Technical Translation STT is a highly complex and knowledge intensive field of translation and cognitive linguistics is a usage based linguistic framework which provides powerful theoretical tools for modelling knowledge organisation and representation in discourse This book explores the interface between scientific and technical translation studies and cognitive linguistics by discussing the epistemological contextual textual and cross linguistic dimensions of scientific and technical translation from a cognitive linguistic perspective Particular emphasis is placed on explicitation and implicitation as indicators of the interaction between text and context in STT The corpusbased investigation of the two phenomena illustrates the complex knowledge requirements pertaining to scientific and technical translation and demonstrates the explanatory power of cognitive linguistics with regard to important textual and contextual aspects of STT

Text Typology and Translation Anna Trosborg, 1997-11-27. This book breaks new ground in translation theory and practice. The central question is In what ways are translations affected by text types. The two main areas of investigation are A What are the advantages of focusing on text types when trying to understand the process of translation. How do translators tackle different text types in their daily practice. B To what extent and in what areas are text types identical across languages and cultures. What similarities and dissimilarities can be observed in text types of original and translated texts. Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain specific texts in a cross cultural perspective while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets sagas fairy tales novels and feature films sermons political speeches international treaties instruction leaflets business letters academic lectures academic articles medical research articles technical brochures and legal documents are but some of the texts under investigation. In sum this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the

translator in his/her efforts to become a competent text-aware professional

New Approaches to Contrastive

Linguistics Renata Enghels, Bart Defrancq, Marlies Jansegers, 2020-07-20 The practice of comparing languages has a long tradition characterized by a cyclic pattern of interest. Its meeting with corpus linguistics in the 1990s has led to a new sub-discipline of corpus-based contrastive studies. The present volume tackles two main challenges that had not yet been fully addressed in the literature: namely an empirical assessment of the nature of the data commonly used in cross-linguistic studies (e.g. translation data versus comparable data) and the development of advanced methods and statistical techniques suitably adapted to contrastive research settings. The papers collected in this volume endeavour to find out what new types of data are most useful for what kind of contrastive questions and which advanced statistical techniques are most suited to deal with the multidimensionality of contrastive research questions. Answers to these questions are provided through the contrastive analysis of various language pairs or groups and a wide variety of phenomena situated at almost all linguistic levels. In sum, this book provides an update on new methodological and theoretical insights in empirical contrastive linguistics and will stimulate further research within this field. Linguistics and Translation Şaban KÖKTÜRK, 2025-04-09

Directions for the Future Leslie Elmer Sheldon, 2004 The papers comprising this volume are selected from presentations made at the 2001 Conference of the British Association of Lecturers in English for Academic Purposes which was held at the University of Strathclyde in Glasgow, Scotland. The role of EAP (English for Academic Purposes) is increasingly important as higher education institutions consider their linguistic support strategies both for native and non-native speakers of English and confront the potential of the world-wide web as a scholarly and pedagogic resource. The articles collected consider EAP as an international profession from a number of vital and relevant perspectives including practical pedagogy research and the impact of new technology. The Routledge Handbook of Translation and Cognition Fabio Alves, Arnt

Jakobsen, 2020-05-31 The Routledge Handbook of Translation and Cognition provides a comprehensive state-of-the-art overview of how translation and cognition relate to each other, discussing the most important issues in the fledgling sub-discipline of Cognitive Translation Studies (CTS) from foundational to applied aspects. With a strong focus on interdisciplinarity, the handbook surveys concepts and methods in neighbouring disciplines that are concerned with cognition and how they relate to translational activity from a cognitive perspective. Looking at different types of cognitive processes, this volume also ventures into emergent areas such as neuroscience, artificial intelligence, cognitive ergonomics, and human-computer interaction. With an editor's introduction and 30 chapters authored by leading scholars in the field of Cognitive Translation Studies, this handbook is the essential reference and resource for students and researchers of translation and cognition and will also be of interest to those working in bilingualism, second language acquisition, and related areas. *Terminology in English Language Teaching* Roger Berry, 2010 Based on original research and novel concepts, this book investigates the nature and use of terminology from linguistic and applied viewpoints. Throughout, problems with terminology such as overuse

by teachers and cases of synonymy and polysemy are considered and solutions are offered Part One looks firstly at some basic concepts then draws important distinctions between pedagogic and scientific terminology and between transparent opaque and iconic terms before examining the historical lexical and grammatical nature of terms Part Two attempts to estimate the value and relevance of terminology in language teaching and describes the use and knowledge of terminology in various language teaching related constituencies learners teachers textbooks grammars and research It concludes with a discussion of the criteria for evaluating terms and an analysis of terms used in ELT

Quantitative Methods in Corpus-Based Translation Studies Michael P. Oakes, Meng Ji, 2012-03-20 This is a comprehensive guidebook to the quantitative methods needed for Corpus Based Translation Studies CBTS It provides a systematic description of the various statistical tests used in Corpus Linguistics which can be used in translation research In Part 1 Theoretical Explorations the interplay between quantitative and qualitative methodologies is explored Part 2 Essential Corpus Studies describes how to undertake quantitative studies with a suitable level of technical and relevant case studies Part 3 Quantitative Explorations of Literary Translations looks at translations of classic works by Cao Xueqin James Joyce and other authors Finally Part 4 on Translation Lexis uses a variety of techniques new to translation studies including multivariate analysis and game theory This book is aimed at students and researchers of corpus linguistics translation studies and quantitative linguistics It will significantly advance current translation studies in terms of methodological innovation and will fill in an important gap in the development of quantitative methods for interdisciplinary translation studies
