Manual de informática forense Luis Enrique Arellano González, María Elena Darahuge, 2021-06-03 Mucha agua ha pasado bajo el puente desde aquel momento en que corriendo el año 2004 los autores iniciaban el Primer Curso de Experto en Informática Forense en la Universidad Tecnológica Nacional Facultad Regional Avellaneda. Se trataba de un intento de difundir la disciplina como parte integradora de la metodología criminalística con tecnologías y técnicas informáticas y en el marco legal de nuestro país. Como soporte al precitado curso se instrumentó el primer Grupo de Expertos en Informática Forense hoy con más de 1250 miembros en América Latina y España. El resultado de aquella tarea fue la elaboración de dos manuales también publicados por la Editorial Errepar: el Manual de Informática Forense donde se sentaron las bases teóricas de la disciplina adaptada a nuestra realidad judicial y luego el Manual de Informática Forense II con la pretensión de extender la disciplina hacia la computación móvil. En las postrimerías del año 2012 hoy la tecnología nos ha pasado por el costado el Derecho como siempre corre desde atrás y desde muy lejos. Los intentos que realiza por reducir la distancia parecen fuegos fatuos. La problemática para instaurar el sistema de notificaciones electrónicas por parte de la CSJN es prueba cabal de ello. Sin embargo los operadores del Derecho y los auxiliares del juez no pueden darse el lujo de perder el tren tecnológico so pena de incrementar la inseguridad jurídica que nos afecta a todos. Por esa razón creemos que la única forma de evitar la brecha es la capacitación permanente de todos los involucrados y la difusión amplia e indiscriminada del conocimiento que cada día se amplía, evoluciona, cambia y se perfecciona. La primera parte de esta nueva obra pretende acercar a los operadores del Derecho una herramienta sencilla y útil para realizar una gestión eficiente, efectiva y eficaz de la prueba documental informática aproximando las tres disciplinas involucradas: Criminalística, Informática y Derecho mediante un lenguaje comprensible para los destinatarios. La segunda parte está especialmente orientada a los peritos, expertos y otros auxiliares del juez brindando una serie de ejercicios prácticos resueltos que facilitan la capacitación de los profesionales jóvenes que se aproximan a la disciplina y unifican la metodología de resolución pericial para los más avezados. No existen peritos de la vieja escuela simplemente porque no existe una vieja escuela ya que la Informática forense en nuestro país aún no ha cumplido las dos décadas. La Prof. Mg. María Elena Darahuge y el Prof. Esp. Luis Enrique Arellano González han intentado por este medio complementar las dos obras antes citadas y brindar continuidad al proceso de formación permanente que la Informática forense estimula en sus cultores. La tecnología impulsa el Derecho, espera con premura y la ciudadanía exige con impaciencia.
