18	\$ 11,258	\$ 135,090

For families with more than 18 persons, add \$568 for each additional person.

These figures are based on the 2021 Federal Poverty Guidelines published in the US Department of Health and Human Services in the Federal Register/Volume 86/Number 19/February 1, 2021. Given that HHS allows 150% of FPG or 60% of SMI, where 200% of FPG is lower than 60% of SMI the program will be using 200% of FPG as our highest category. However, for the household size of 7 to 10 members, the benefit at 200% would exceed the allowable 60% SMI. For households larger than 10 members, the 150% will be set as the maximum income eligibility criteria. The state reserves the right to adjust these levels based on the availability of federal appropriations.

Liheap Income Guidelines 2014:

Federal Register ,2014 **Options for Reducing the Deficit** United States. Congressional Budget Office,2013 From the Introduction This volume presents 103 options that would decrease federal spending or increase federal revenues over the next decade Those options cover many areas ranging from defense to energy Social Security and provisions of the tax code The budgetary effects identified for most of the options span the 10 years from 2014 to 2023 the period covered by CBO's May 2013 baseline budget projections although many of the options would have longer term effects as well Chapters 2 through 5 present options in the following categories Chapter 2 Mandatory spending other than that for health related programs Chapter 3 Discretionary spending other than that for health related programs Chapter 4 revenues other than those related to health Chapter 5 Health related programs and revenue provisions In addition to 11 options that are similar in scope to others in this volume Chapter 5 includes 5 broad approaches for reducing spending on health care programs or revenues forgone because of tax provisions related to health care Each would offer lawmakers a variety of possibilities for making changes in current laws Chapter 6 differs from the rest of the volume it discusses the challenges and the potential budgetary effects of eliminating a cabinet department **Options for reducing the deficit** ,2013 **Catalog of Federal Domestic Assistance** ,1969 Identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs **Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2016** United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies,2015 **Driven by Demand** Jimmy Y. Jia,Jason Crabtree,2015-06-09 Energy plays a central role in shaping our society and infrastructure making it increasingly important for today's leaders to understand the impact of energy decisions Discussions about energy often neglect important historical lessons about previous energy transformations and provide inadequate consideration of context Driven by Demand takes a fresh approach by exploring the emergence of energy systems outcomes and priorities It outlines select historical and current events challenges and developing energy trends using a range of case studies Readers will gain foundational knowledge about energy flows and end uses helping them to become more conversant about energy outcomes and priorities This accessible book paves the way for broader discussions about societal resilience privacy and security concerns associated with the move towards smart infrastructure This is a must read for business executives policymakers and students working in energy policy energy management and sustainable business **Powerless** Diana Hernández,Jennifer Laird,2025-04-08 Energy serves as the lifeblood of our daily experiences It permeates virtually every aspect of our existence facilitating nourishment safety and productivity When affordability threatens energy's availability a family's living situation can become untenable too cold too hot too dark and too often unhealthy and unsafe In Powerless sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy

insecurity the inability to adequately meet household energy needs Approximately one in ten households in the U S are energy insecure and four in ten are at risk for energy insecurity These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions Drawing on survey data and interviews with one hundred energy insecure individuals and families Hernandez and Laird detail the experience of energy insecurity Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills utility debt and disconnection from utility services They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems They are often forced to make difficult choices about what bills to pay These decisions are sometimes referred to as heat or eat choices as families cannot afford to pay for heating and food at the same time Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices This includes deliberate underconsumption of energy enduring physical discomfort and using dangerous alternatives such as open flames ovens or space heaters to try to maintain a comfortable temperature in their home To be energy insecure is to suffer Despite the heavy toll of energy insecurity most people confront these difficulties behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hernandez and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable energy resources Powerless creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality
