   Linguistic Issues in Machine Translation Frank Van Eydne,2015-12-17 The key assumption in this text is that machine translation is not merely a mechanical process but in fact requires a high level of linguistic sophistication as the nuances of syntax semantics and intonation cannot always be conveyed by modern technology The increasing dependence on artificial communication by private and corporate users makes this research area an invaluable element when teaching linguistic theory   The Body in Language Horst Ruthrof,2015-12-17 This book opposes the position that meanings can be explained by way of intralinguistic relations as in structural linguistics and its successors and rejects definitional descriptions of meaning as well as naturalistic accounts The idea that we are able to live by strings of mere signifiers is shown to rest on a misconception Ruthrof also attempts an explanation of why arguments grounded in a post Saussurean view of language as for instance certain feminist theories find it so difficult to show how precisely the body can be reclaimed as an integral part of linguistic signs In reinstating the body in language Ruthrof draws on Peirce Husserl Heidegger Wittgenstein and Derrida cognitive linguistics and rhetoric as well as on the writings of Helen Keller   New Concepts in Natural Language Generation Helmut Horacek,2015-12-17 This book aims to inform researchers with an interest in natural language generation about advances in the field It is organised around four topics system architectures content planning discourse planning and realisation in linguistic form and it presents some of the most important works in this area of research
