Writing Skills Teacher's Book Norman Coe, Robin Rycroft, Pauline Ernest, 1983-03-31 Writing Skills provides learners with problem solving activities based on a wide variety of text types. The activities give practice in using specific items of language and in developing the ability to organise information. Text types covered are letters both informal and formal reports brochures journalistic articles instructions and stories. In all cases emphasis is placed on group work and substantial opportunities and ideas for further practice are given throughout. The Teacher's Book contains notes and a key as well as comprehensive explanations of the rationale behind the exercises.

Unexpected Links Between Egyptian and Babylonian Mathematics Jöran Friberg, 2005 Mesopotamian mathematics is known from a great number of cuneiform texts most of them Old Babylonian some Late Babylonian or pre Old Babylonian and has been intensively studied during the last couple of decades. In contrast to this Egyptian mathematics is known from only a small number of papyrus texts and the few books and papers that have been written about Egyptian mathematical papyri have mostly reiterated the same old presentations and interpretations of the texts. In this book it is shown that the methods developed by the author for the close study of mathematical cuneiform texts can also be successfully applied to all kinds of Egyptian mathematical texts hieratic demotic or Greek Egyptian. At the same time comparisons of a large number of individual Egyptian mathematical exercises with Babylonian parallels yield many new insights into the nature of Egyptian mathematics and show that Egyptian and Babylonian mathematics display greater similarities than expected.
