

List of surgical procedures

Surgical procedures have long and possibly daunting names. The meaning of many surgical procedure names can often be understood if the name is broken into parts. For example in gastrectomy, "ectomy" is a suffix meaning the removal of a part of the body. "Gastro-" means stomach. Thus, gastrectomy refers to the surgical removal of the stomach (or sections thereof). "otomy" means to cut into a part of the body; a gastrotomy would be to cut into, but not necessarily remove, the stomach.

The field of minimally invasive surgery has spawned another set of words, such as *arthroscopic* or *laparoscopic* surgery. These take the same form as above; an arthroscope is a device which allows the inside of the joint to be seen.

- *hepat-* : related to the liver
- *hyster-* : related to the uterus
- *lamino-* : related to the lamina (posterior aspect of vertebra)
- *lapar-* : related to the abdominal cavity
 - Etymology actually refers to soft, fleshy part of abdominal wall. The term *celio-* is probably more accurate and used in America.

- *lobo-* : related to a lobe (of the brain or lungs)
- *mamm-* and *mast-* : related to the breast
- *myo-* : related to muscle tissue
- *nephro-* : related to the kidney
- *oophor-* : related to the ovary
