Jain, Marius Mircea Balas, Dumitru Baleanu, 2023-10-26 Soft computing techniques open significant opportunities in several areas such as industry medicine energy security transportation and education This book provides theory and applications development using soft computing techniques by organizing intelligent systems for many applications to the benefit of humanity The book comes from a multidisciplinary subject whose audience can come from different academic departments e g department of computer science and engineering department of medical imaging department of biomedical informatics department of education sciences and so on where artificial intelligence and soft computing are of routine courses The book covers a range of audience from academicians practitioners researchers and students to stakeholders It can support graduate students and interns to develop a deep understanding of the latest paradigms in the soft computing techniques

From Smart Homes to Smart Care Sylvain Giroux, Hélène Pigot, 2005 Nowadays networks microprocessors memory chips smart sensors and actuators are faster cheaper and smaller than ever They are becoming available anywhere anytime Current advances in such enabling technologies let foresee novel applications and services for improving the life of elderly and disabled people in their home and outside These conference proceedings present the latest approaches and technical solutions in the area of smart homes health telematics and enabling technologies The first chapter delves into the user perspective to ascertain real needs and design truly useful services The following chapter explores the enabling technology Distributed sensors smart devices and networks appear as the nuts and bolts compulsory to build up smart homes Chapter three looks at the realization of smart homes Pervasive computing is emerging as one of the key approaches to organize computations within smart homes The fourth chapter addresses the issue of using smart home features to design and deliver smart care services to persons with disabilities and elderly people Finally Chapter five outlines standardization efforts and practical and industrial experiences

ICOST aims at creating an active research community dedicated to explore how smart homes in particular and health telematics in general can foster independent living and an enhanced life style for elderly and disabled people On the one hand smart homes are augmented environments with embedded computers information appliances and multi modal sensors allowing people to perform tasks efficiently by offering unprecedented levels of access to information and assistance from computer On the other hand health telematics makes the most of networks and telecommunications to propose health services expertise and information at distance
