**Solving the Homework Problem by Flipping the Learning** Jonathan Bergmann, 2017-04-11 Teachers view homework as an opportunity for students to continue learning after the bell rings For many students it is often just the dreaded H word How can educators change the way students view homework while ensuring that they still benefit from the additional learning it provides It is easy Flip the learning In Solving the Homework Problem by Flipping the Learning Jonathan Bergmann the co founder of the flipped learning concept shows you how The book outlines why traditional homework causes dread and frustration for students how flipped learning completing the harder or more analytical aspects of learning in class as opposed to having students do it on their own improves student learning and how teachers can create flipped assignments that both engage students and advance student learning Bergmann introduces the idea of flipped videos and provides step by step guidance to make them effective The book also includes useful forms a student survey and a sample letter to send to parents explaining the flipped learning concept You want your students to learn and your students want learning to be accessible With that in mind read through these pages flip the learning in your classroom and watch students get excited about homework

**Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles** Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i.e. extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner

developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation Instructional Moves for Powerful Teaching in Higher Education Jeremy T. Murphy,Meira Levinson,2023-03-07 A toolkit of strategies for postsecondary instructors to use to cultivate safe inclusive learning spaces and improve teaching Based on work conducted through the Instructional Moves project at Harvard University Instructional Moves for Powerful Teaching in Higher Education outlines the many ways in which good college and graduate school teaching is rooted in deliberate pedagogical choices that support active learning Jeremy T Murphy and Meira Levinson distill good instruction to its essential components analyzing the careful steps successful instructors take to create learning spaces that encourage all students to do ambitious work Profiling professors in a range of contexts and disciplines Murphy and Levinson take readers on deep dives into individual instructors teaching methods in actual classrooms Each real world example is accompanied by a set of practical action points that can be adopted by both new and experienced instructors communities of practice and educational developers and coaches Collectively the examples underscore how students with differing abilities diverse identities and disparate worldviews can all benefit from student centered learning environments in which collaboration is valued and students are afforded opportunities to apply what they have learned Murphy and Levinson spotlight inclusive instructional moves such as community building exercises interactive lectures and discussion facilitation that nurture a sense of belonging and encourage student engagement in both in person and online settings They also explore the benefits of innovative teaching formats such as flipped classrooms simulations and virtual learning Instructional Moves for Powerful Teaching in Higher Education illustrates how pedagogical shifts small and large can improve college teaching powerfully

*Handbook of College Science Teaching* Joel J. Mintzes,2006 The Handbook offers models of teaching and learning that go beyond the typical lecture laboratory format and provides rationales for new practices in the college classroom It is ideal for graduate teaching assistants senior faculty and graduate coordinators and mid career professors in search of reinvigoration

Making Scientists Gregory Light,Marina Micari,2013-03-05 Gregory Light and Marina Micari reject the view that science technology engineering and mathematics are elite disciplines restricted to a small number with innate talent Rich in concrete advice Making Scientists offers a new paradigm of how scientific subjects can be taught at the college level Handbook on Personalized Learning for States, Districts, and Schools Marilyn Murphy,Sam Redding,Janet Twyman,2016-07-01 The recent passage of the Every Student Succeeds Act ESSA presents new opportunities and greater flexibility in efforts to personalize learning for all children The Handbook on Personalized Learning for States Districts and Schools provides insight and guidance on maximizing that new flexibility Produced by the Center on Innovations in Learning CIL one of seven national content centers funded by the U S Department of Education this volume suggests how teachers can enhance personalized

learning by cultivating relationships with students and their families to better understand a child's learning and motivation. Personalized learning also encourages the development of students' metacognitive, social, and emotional competencies, thereby fostering students' self-direction in their own education, one aimed at mastery of knowledge and skills and readiness for career and college. Chapters address topics across the landscape of personalized learning, including co-designing instruction and learning pathways with students, variation in the time, place, and pace of learning, including flipped and blended classrooms, and using technology to manage and analyze the learning process. The Handbook's chapters include Action Principles to guide states, districts, and schools in personalizing learning.

*Active Learning in College Science* Joel J. Mintzes, Emily M. Walter, 2020-02-23

This book explores evidence-based practice in college science teaching. It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching. In editing this book, we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines. Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence. Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges, 4-year liberal arts institutions, comprehensive regional campuses, and flagship research universities. In keeping with Wieman's challenge, our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences. The content is structured as follows: after an Introduction based on Constructivist Learning Theory, Section I the practices we explore are Eliciting Ideas and Encouraging Reflection; Section II Using Clickers to Engage Students; Section III Supporting Peer Interaction through Small Group Activities; Section IV Restructuring Curriculum and Instruction; Section V Rethinking the Physical Environment; Section VI Enhancing Understanding with Technology; Section VII and Assessing Understanding; Section VIII. The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses. The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events. Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years. In this view, learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base. For most students, that knowledge base is riddled with a host of naïve notions, misconceptions, and alternative conceptions they have acquired throughout their lives. To a considerable extent, the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view, to assist as students restructure and reconcile their newly acquired knowledge, and to provide opportunities for students to evaluate what they have learned and

apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for **Behavior Analysis for Effective Teaching** Julie S. Vargas,2013 Modern classrooms face an increasing population of special needs students and regular students who have behavioural problems The mission of this book is to show teachers and other human service professionals working in school settings how to employ non aversive behaviour analysis principles in classrooms and other school settings **Teaching Tech Together** Greg Wilson,2019-10-08 Hundreds of grassroots groups have sprung up around the world to teach programming web design robotics and other skills outside traditional classrooms These groups exist so that people don t have to learn these things on their own but ironically their founders and instructors are often teaching themselves how to teach There s a better way This book presents evidence based practices that will help you create and deliver lessons that work and build a teaching community around them Topics include the differences between different kinds of learners diagnosing and correcting misunderstandings teaching as a performance art what motivates and demotivates adult learners how to be a good ally fostering a healthy community getting the word out and building alliances with like minded groups The book includes over a hundred exercises that can be done individually or in groups over 350 references and a glossary to help you navigate educational jargon **Perspectives on Enhancing Learning Experience Through Digital Strategy in Higher Education** Munna, Afzal Sayed,Nadda, Vipin,Allahyari, Theo Ammari,Cantafio, Giuseppe,Bilan, Sahidi,2023-07-24 Digital technology is changing the way we think operate communicate and avail services including education In recent years there has been an increasing demand in the higher education sector to implement digital transformation especially in the way we deliver education Perspectives on Enhancing Learning Experience Through Digital Strategy in Higher Education explores various factors enhancing the learning experience considers the impact of digital strategy to enhance the learning experience and analyzes learning challenges and opportunities for students in the higher education environment The book also helps improve students perceptions communication quality of education critical thinking self learning and satisfaction in higher education Covering key topics such as digital technology critical thinking and digital innovation this premier reference source is ideal for industry professionals administrators policymakers higher education faculty researchers academicians scholars practitioners instructors and students **Models for Improving and Optimizing Online and Blended Learning in Higher Education** Keengwe, Jared,Agamba, Joachim Jack,2014-07-31 This book examines the benefits and costs associated with the utilization of technology mediated instructional environments recognizing that instructional technology could offer alternative means of communication for understanding Provided by publisher **Mobile and Blended Learning Innovations for Improved Learning Outcomes** Parsons, David,2016-05-03 The integration of technology into educational settings has revolutionized classroom instruction in recent years By properly utilizing available digital resources students learning experiences can be significantly enhanced Mobile and Blended Learning Innovations for Improved Learning Outcomes is an authoritative reference source for the latest

research on the use and benefits of technological tools in contemporary classrooms and showcases how these devices improve the overall learning process Highlighting the distinctions and interactions between mobile and blended education this book is ideally designed for practitioners professionals academicians and students interested in the effective implementation of modern technology in the classroom *Improving How Universities Teach Science* Carl

Wieman,2017-05-22 Too many universities remain wedded to outmoded ways of teaching Too few departments ask whether what happens in their lecture halls is effective at helping students to learn and how they can encourage their faculty to teach better But real change is possible and Carl Wieman shows us how it can be done through detailed tested strategies

*Teaching with Classroom Response Systems* Derek Bruff,2009-10-22 There is a need in the higher education arena for a book that responds to the need for using technology in a classroom of tech savvy students This book is filled with illustrative examples of questions and teaching activities that use classroom response systems from a variety of disciplines with a discipline index The book also incorporates results from research on the effectiveness of the technology for teaching Written for instructional designers and re designers as well as faculty across disciplines A must read for anyone interested in interactive teaching and the use of clickers This book draws on the experiences of countless instructors across a wide range of disciplines to provide both novice and experienced teachers with practical advice on how to make classes more fun and more effective Eric Mazur Balkanski Professor of Physics and Applied Physics Harvard University and author Peer Instruction A User s Manual Those who come to this book needing practical advice on using clickers in the classroom will be richly rewarded with case studies a refreshing historical perspective and much pedagogical ingenuity Those who seek a deep thoughtful examination of strategies for active learning will find that here as well in abundance Dr Bruff achieves a marvelous synthesis of the pragmatic and the philosophical that will be useful far beyond the life span of any single technology Gardner Campbell Director Academy for Teaching and Learning and Associate Professor of Literature Media and Learning Honors College Baylor University Chemistry Education Javier García-Martínez,Elena
