Unit Operations of Chemical Engineering Warren Lee McCabe, Julian Cleveland Smith, 1967 **Unit Operations of Chemical Engineering** Julian Smith, Warren McCabe, Peter Harriott, emeritus, 2004-10-27 Recently Published Unit Operations of Chemical Engineering 7th edition continues its lengthy successful tradition of being one of McGraw Hill's oldest texts in the Chemical Engineering Series. Since 1956 this text has been the most comprehensive of the introductory undergraduate chemical engineering titles available. Separate chapters are devoted to each of the principle unit operations grouped into four sections: fluid mechanics, heat transfer, mass transfer, and equilibrium stages and operations involving particulate solids. Now in its seventh edition, the text still contains its balanced treatment of theory and engineering practice with many practical illustrative examples included. Almost 30% of the problems have been revised or are new, some of which cover modern topics such as food processing and biotechnology. Other unique topics of this text include diafiltration, adsorption, and membrane operations. **Handbook of Industrial Drying** Arun S. Mujumdar, 2014-07-11 This Fourth Edition book includes 12 new chapters covering computational fluid dynamic simulation, solar impingement, and pulse combustion drying; drying of fruits, vegetables, sugar, biomass, and coal; physicochemical aspects of sludge drying; and life cycle assessment of drying systems. Addressing commonly encountered dryers as well as innovative dryers with future potential, the fully revised text not only delivers a comprehensive treatment of the current state of the art but also serves as a consultative reference for streamlining industrial drying operations to increase energy efficiency and cost effectiveness. *Handbook of Industrial Drying, Fourth Edition* Arun S. Mujumdar, 2014-07-11 By far the most commonly encountered and energy intensive unit operation in almost all industrial sectors, industrial drying continues to attract the interest of scientists, researchers, and engineers.
