Introduction historique au droit romain Alphonse Rivier, 1881 *An Historical Introduction to Private Law* R. C. van Caenegem, 1992-03-27 This book provides an introduction to the rise and development of present day private law *Leçons d'introduction générale à l'histoire du droit matrimonial français (cours de doctorat)* Charles Lefebvre, 1900 *Law and Opinion in Scotland during the Seventeenth Century* John D Ford, 2007-11-20 In Britain at least changes in the law are expected to be made by the enactment of statutes or the decision of cases by senior judges Lawyers express opinions about the law but do not expect their opinions to form part of the law It was not always so This book explores the relationship between the opinions expressed by lawyers and the development of the law of Scotland in the century preceding the parliamentary union with England in 1707 when it was decided that the private law of Scotland was sufficiently distinctive and coherent to be worthy of preservation Credit for this surprising decision which has resulted in the survival of two separate legal systems in Britain has often been given to the first Viscount Stair whose *Institutions of the Law of Scotland* had appeared in a revised edition in 1693 The present book places Stair's treatise in historical context and asks whether it could have been his intention in writing to express the type of authoritative opinions that could have been used to consolidate the emerging law and whether he could have been motivated in writing by a desire to clarify the relationship between the laws of Scotland and England In doing so the book provides a fresh account of the literature and practice of Scots law in its formative period and at the same time sheds light on the background to the 1707 union It will be of interest to legal historians and Scots lawyers but it should also be accessible to lay readers who wish to know more about the law and legal history of Scotland **Theologians and Contract Law** Wim Decock, 2013 In *Theologians and Contract Law* Wim Decock offers an account of the moral roots of modern contract law He explains why theologians in the sixteenth and seventeenth centuries built a systematic contract law around the principles of freedom and fairness *Global Governance and the Quest for Justice - Volume II* SORCHA MacLeod, 2006-11-06 This book one in the four volume set *Global Governance and the Quest for*

Justice focuses on the role of corporations in an increasingly globalised world Against the backcloth of perceived abuse of corporate power alleged violations of human rights degradation of the environment abuse of labour Enron style financial scandals and the like the chapters in this collection examine the nature and function of the corporation as well as the way in which we should understand corporate governance and the power of transnational corporations Central to the question is the issue of accountability as well as the questions of social and environmental responsibility here the authors ask whether corporations should be more accountable relative to the broader public interest and suggest that public law approaches to accountability may offer a way forward Consideration is also given to the most appropriate regulatory locus local regional or international and the most effective form of response to the deficit in corporate responsibility and the abuse of corporate power For example are transnational corporations most effectively regulated internationally e g by the United Nations regionally e g by the EU or NAFTA or locally e g through stringent reporting requirements and implementation of triple bottom line standards

A History of European Law Paolo Grossi, 2010-02-04 This book explores the development of law in Europe from its medieval origins to the present day charting the transformation from law rooted in the Church and local community towards a recognition of the centralised secular authority of the state Shows how these changes reflect the wider political economic and cultural developments within European history Demonstrates the diversity of traditions between European states and the possibilities and limitations in the search for common European values and goals

French Criminal Justice Jacqueline Hodgson, 2005-11-08 Basing much of its analysis upon the first systematic empirical study of the French pre trial process this monograph breaks new ground in the field of comparative criminal justice Moving away from idealised accounts of judicially supervised investigations it provides a better understanding of the ways in which an inquisitorially rooted criminal process operates in practice and the factors that influence and constrain its development and functioning The structure and operation of French criminal justice is set within a broad range of contexts of political occupational and legal cultures from the French Republican tradition of state centred models of authority across the growing influence of the ECHR to the local conditions which determine the ways in which individual discretion is exercised The French model of investigative supervision and accountability is contrasted with more adversarial procedures and in particular the different ways in which the reliability of evidence is guaranteed and the interests of the accused protected Systematic observation of the daily working practices of police gendarmes prosecutors and juges d'instruction across a number of sites and time periods provides a unique and detailed account of the ways in which the French criminal process operates in practice The understandings and insights generated from this data are then set within a wider legal and political analysis which considers issues such as the influence and interference of the State within matters of justice a comparative analysis of the judicial and defence functions and the extent to which ECHR fair trial guarantees are able to produce legal and ideological change within a process which depends upon a central and judicially supervised investigating authority An

informed knowledge of other European criminal procedures is increasingly essential for those working within UK as well as comparative criminal justice if there is to be a proper engagement with and evaluation of measures such as the EUs proposed Council Framework Decision on Certain Procedural Rights in Criminal Proceedings throughout the European Union as well as recent legislative reform in England and Wales that seeks to adjust the pre trial roles of police and prosecutor in significant ways This book will be essential reading for teachers researchers students and policy makers working in the areas of criminal justice in the UK and across Europe in comparative criminal justice criminology as well as in French and European studies
