Real Wages in Manufacturing, 1890-1914 Albert Rees, 2015-12-08 Previous wage studies of the period before World War I found that real wages remained stable from 1890 to 1914 despite the continued growth of the economy This study indicates that this conclusion was based on faulty statistics Using new estimates of money wages and a new cost of living index Mr Rees shows that real wages rose considerably in this period although less than in later years His findings will require revision of the prevailing viewpoint Originally published in 1961 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 The

Development of Southern Public Libraries and the African American Quest for Library Access, 1898-1963 Dallas Hanbury, 2019-12-04 Using the Atlanta Birmingham and Nashville Public Libraries as case studies The Development of Southern Public Libraries and the African American Quest for Library Access 1898 1963 argues that public libraries played an integral role in Southern cities economic and cultural boosterism efforts during the New South and Progressive Eras First Southern public libraries helped institutionalize segregation during the early twentieth century by refusing to serve African Americans or only to a limited degree Yet the Progressive Era s emphasis on self improvement and moral uplift influenced Southern public libraries to the extent that not all embraced total segregation It even caused Southern public libraries to remain open to the idea of slowly expanding library service to African Americans Later libraries social mission and imperfect commitment to segregation made them prime targets for breaking down the barriers of segregation in the post World War II era In this study Dallas Hanbury concludes that dealing with the complicated and unexpected outcomes of having practiced segregation constituted a difficult and lengthy process for Southern public libraries Base Colonies in the Western

Hemisphere, 1940-1967 S. High, 2008-12-22 This book examines the social economic and political aftermath of the famous Anglo American destroyers for bases deal of 2nd September 1940 that saw fifty obsolete U S destroyers exchanged for base colonies in Trinidad Bermuda Newfoundland and the Bahamas *Lineages of the Global City* Shiben Banerji, 2025-07-08 The forgotten history of the occult foundations of the early twentieth century global city War revolution genocide rebellion slump The economic and political turmoil of the early twentieth century seemed destined to rip asunder the ties that bound colonizers and the colonized to one another The upheaval represented an opportunity and not just to nationalists who imagined new homelands or to socialists who dreamed of international brotherhood For modernists in the orbit of various occultisms the crisis of empire also represented an opportunity to reveal humanity s fundamental unity and common fate Lineages of the Global City recounts a continuous if also contentious transnational exchange among modernists and

occultists across the Americas Europe South Asia and Australia between 1905 and 1949 At stake were the feelings and affect of a new global subject who would perceive themselves as belonging to humanity as a unified whole and the urban environment that would foster their subjectivity The interventions in this debate which drew in the period s most renowned modernists took the form of a succession of plans for cities suburbs and communes as well as experiments in building drawing printmaking filmmaking and writing Weaving together postcolonial feminist and Marxist insight on subject formation Shiben Banerji advances a new way of understanding modernist urban space as the design of subjective effects

Keeping his focus on America science historian Nathaniel Comfort introduces the community of scientists physicians and public health workers who have contributed to the development of medical genetics from the nineteenth century to today He argues that medical genetics is closely related to eugenics and indeed the two cannot be fully understood separately He also carefully examines how the desire to relieve suffering and to improve ourselves genetically though noble may be subverted History makes clear that as patients and consumers we must take ownership of genetic medicine using it intelligently knowledgeably and skeptically lest pernicious interests trump our own div

Black Marxism Cedric J. Robinson, 2005-10-12 In this ambitious work first published in 1983 Cedric Robinson demonstrates that efforts to understand black people s history of resistance solely through the prism of Marxist theory are incomplete and inaccurate Marxist analyses tend to presuppose European models of history and experience that downplay the significance of black people and black communities as agents of change and resistance Black radicalism must be linked to the traditions of Africa and the unique experiences of blacks on western continents Robinson argues and any analyses of African American history need to acknowledge this To illustrate his argument Robinson traces the emergence of Marxist ideology in Europe the resistance by blacks in historically oppressive environments and the influence of both of these traditions on such important twentieth century black radical thinkers as W E B Du Bois C L R James and
