Expert Systems and Geographic Information Systems for Impact Assessment Agustin Rodriguez-Bachiller, John Glasson, 2004-08-12 Impact Assessment is becoming part and parcel of an increasing number of development proposals in the UK and Europe As the practice of Impact Assessment develops it becomes more standardized and good practice starts to be defined However the quality of Impact Assessment is still far from satisfactory Expert Systems and GIS for Impact Assessment

Park Management in Ghana Using Geographic Information Systems (GIS) and Remote Sensing Technology Yaw A. Twumasi, 2005 This book provides information for effective management of natural resources especially national parks using GIS and remote sensing technologies to guide policy development in managing protected areas of Ghana Some lessons and constraints are drawn from developed and developing countries to understand how GIS and remote sensing technologies could assist with park management

The Promoting and Licensing of Petroleum Prospective Acreage Michael Bunter, 2002-01-17 This detailed work is based on more than ten years experience in conducting tenders for the licensing of petroleum prospective acreage on behalf of a number of sovereign governments in Europe Africa and the former Soviet Union It explains the processes of licensing from the points of view of the two main protagonists the government bodies and the international oil companies The book also gives due prominence to the interests of the host communities and to the environment as well as to the neighbouring states and the other participants who may be affected by the licensing process In the modern world petroleum licensing takes place in the full glare of attention from the press and from public opinion This work breaks new ground in recommending ways in which government and the oil companies may devise best practice in licensing to serve the interest of all parties and also an ethical business environment

[African Handbook of Climate Change Adaptation](#) Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a major global challenge However some geographical regions are more severely affected than others One of these regions is the African continent Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas The 5th Assessment Report produced

by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate It is against this background that the African Handbook of Climate Change Adaptation is being published It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced **Earth Observations and Global Change Decision Making**, 1991 The bibliography contains 294 bibliographic citations and abstracts of relevant reports articles and documents announced in Scientific and Technical Aerospace Reports STAR and International Aerospace Abstracts IAA Explainable Machine Learning for Geospatial Data Analysis Courage Kamusoko, 2024-12-06 Explainable machine learning XML a subfield of AI is focused on making complex AI models understandable to humans This book highlights and explains the details of machine learning models used in geospatial data analysis It demonstrates the need for a data centric explainable machine learning approach to obtain new insights from geospatial data It presents the opportunities challenges and gaps in the machine and deep learning approaches for geospatial data analysis and how they are applied to solve various environmental problems in land cover changes and in modeling forest canopy height and aboveground biomass density The author also includes guidelines and code scripts R Python valuable for practical readers Features Data centric explainable machine learning ML approaches for geospatial data analysis The foundations and approaches to explainable ML and deep learning Several case studies from urban land cover and forestry where existing explainable machine learning methods are applied Descriptions of the opportunities challenges and gaps in data centric explainable ML approaches for geospatial data analysis Scripts in R and python to perform geospatial data analysis available upon request This book is an essential resource for graduate students researchers and academics working in and studying data science and machine learning as well as geospatial data science professionals using GIS and remote sensing in environmental fields
