Neurolinguistic Programming in Clinical Settings Lisa de Rijk, Richard Gray, Frank Bourke, 2022-01-11

Neurolinguistic Programming in Clinical Settings provides a theoretical framework for the clinical applications of Neurolinguistic Programming NLP protocols in mental health. It offers evidence based models for a range of conditions including PTSD, anxiety, and depression, grief, phobias, and binge eating. Providing a follow up to the 2014 book *The Clinical Effectiveness of Neurolinguistic Programming*, this book updates the existing research evidence for NLP interventions with mental health clinical conditions. It includes further evidence for its use with somatoform disorders, anxiety, and depression, and as a general psychotherapy modality. The book outlines up to date evidence from clinical trials that demonstrate the success rate of NLP with PTSD populations and discusses how ongoing randomised clinical trials at Kings College London are demonstrating the clinical effectiveness of NLP protocols and are becoming more widely accepted by mainstream mental health care. Written by a team of internationally academically informed clinicians and researchers, the book will be key reading for academics, researchers, and post graduate students in the field of mental health research, psychotherapy, and counselling. It will also be of interest to clinicians and mental health professionals interested in NLP as a therapeutic modality.

Neurolinguistic Psychotherapy Lisa Wake, 2008-03-31 Presented as an effective model for facilitating neurological change through the therapeutic relationship, this book challenges therapists to incorporate a psychodynamic approach within their work.

The Clinical Effectiveness of Neurolinguistic Programming Lisa Wake, Richard M. Gray, Frank S. Bourke, 2013 Despite widespread use, Neurolinguistic Programming (NLP) is a topic of much debate, often receiving criticism from academic and professional sectors. In this book, international academics, researchers, and therapists are brought together to examine the current evidence of the clinical efficacy of NLP techniques, considering how NLP can be effective in facilitating change, enrichment, and symptom relief. Lisa Wake and her colleagues provide a critical appraisal of evidence based research in the area to indicate the benefits of the approach and identify the need for an increase in randomized well controlled clinical trials. Contributors also explore how NLP has been used to treat various disorders, including post traumatic stress disorder, phobias, addictions, anxiety disorders, and mild depression. Illustrated throughout with clinical examples and case studies, this book is key reading for practitioners and researchers interested in NLP, as well as postgraduate students.
