Searles,1967 [Just A Thought](#) Peter Borthwick,2023-09-14 This book is a diverse read offering chapters covering multiple subjects but all linked into the same theme It explores many of the things we have been misinformed about in mainstream media education and religion A chapter by chapter in depth look at various subjects that challenge what we think we know It ultimately proposes an alternative way of thinking and assessing what we have all been informed of through different platforms The book explores the author and some of the key things that have affected his life guiding him to this point now where he wants to share some of his experiences This includes his love of spirituality and the guidance that has been provided to him throughout his life It s an often humorous story with honest snippets from youth through to adulthood It explores all the good and bad aspects of the human experience and his acceptance that it is all part of the journey The second chapter covers our recent technological boom This explores the authors thoughts on how we have progressed so quickly over the last 100 years with a thought provoking challenge as an explanation A look at our history and all the many holes in what we have been informed about through education and religion that frankly do not hold up now with science throwing curve balls into our previous understanding of our past The chapter covers such things as structural anomalies around the world our true origins and the various differing species of humanity that have occupied this planet and many more issues the author has found through his investigations Through Government disclosure and personal accounts the next chapter looks at the subject of are we alone in this universe Starting way back in history and finishing right up to date it looks at the overwhelming evidence that would suggest we are not alone from witness reports abduction cases to crop circles This chapter provides some compelling and fact based evidence to support the authors ideas Following on from the previous

chapter the author looks at our planet and its place in the universe covering the mind boggling numbers that are attached to the incredible size of the known universe and our tiny insignificant place within it It further highlights the facts presented in the previous chapter that discusses are we truly alone in a universe that is difficult to comprehend with its true and enormous size Moving away from historical information the author comes right up to date with a chapter about the modern world He questions that have we really got it right and has life truly improved with all the stress and mental health issues being highlighted these days An example being emails Emails were meant to make life quicker and easier yet in reality they have had a negative effect Regardless of whether you work in an office or a building site you have to factor into your daily life time to look at and respond to emails It s something twenty five years ago did not exist but the world still worked giving us something else to factor into what is not enough time in most people s day It was meant to improve and ease our existence but does it The final chapter tidies up other subjects missed in the book that would be discussed later plus some detailed spiritual experience s the author has had through his life that he wanted to share This book although is deep and meaningful it is none the less easy to read and follow and certainly thought provoking It is a most enjoyable and recommended read
