Manufacturing Consent Changes In The Labor Process Under Monopoly Capitalism:

Manufacturing Consent Michael Burawoy, 1979 Since the 1930s industrial sociologists have tried to answer the question Why do workers not work harder Michael Burawoy spent ten months as a machine operator in a Chicago factory trying to answer different but equally important questions Why do workers work as hard as they do Why do workers routinely consent to their own exploitation Manufacturing Consent the result of Burawoy's research combines rich ethnographical description with an original Marxist theory of the capitalist labor process Manufacturing Consent is unique among studies of this kind because Burawoy has been able to analyze his own experiences in relation to those of Donald Roy who studied the same factory thirty years earlier Burawoy traces the technical political and ideological changes in factory life to the transformations of the market relations of the plant it is now part of a multinational corporation and to broader movements since World War II in industrial relations

Managing the Human Factor Bruce E. Kaufman, 2019-06-30 Human resource departments are key components in the people management system of nearly every medium to large organization in the industrial world They provide a wide range of essential services relating to employees including recruitment compensation benefits training and labor relations A century ago however before the concept of human resource management had been invented the supervision and care of employees at even the largest companies were conducted without written policies or formal planning and often in harsh arbitrary and counterproductive ways How did companies such as United States Steel manage a workforce of 160 000 employees at dozens of plants without a specialized personnel or industrial relations department What led some of these organizations to introduce human resources practices at the end of the nineteenth century How were the earliest personnel departments structured and what were their responsibilities And how did the theory and implementation of human resources management evolve both within industry and as an academic field of research and teaching In Managing the Human Factor Bruce E Kaufman chronicles the origins and early development of human resource management HRM in the United States from the 1870s when the Labor Problem emerged as the nation's primary domestic policy concern to 1933 and the start of the New Deal Through new archival research an extensive review and synthesis of the historical and contemporary literatures and case studies illustrating best and worst practices during this period Kaufman identifies the fourteen ideas events and movements that led to the creation of specialized HRM departments in the late 1910s as well as their further growth and development into strategic business units in the welfare capitalism period of the 1920s The research presented in this book not only uncovers many new aspects of the early development of personnel and industrial relations but also challenges central parts of the contemporary interpretation of the concept and evolution of HRM Rich with insights on both the present and past of human resource management Managing the Human Factor will be widely regarded as the definitive account of the early history of employee management in American companies and a must read for all those interested in the indispensable function of managing people in organizations *The Sociology of Organizations*
