A History of the World in 12 Maps Jerry Brotton, 2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph

Shifts in Mapping Christine Schranz, 2021-11-05 Depicting the world territory and geopolitical realities involves a high degree of interpretation and imagination It is never neutral Cartography originated in ancient times to represent the world and to enable circulation communication and economic exchange Today IT companies are a driving force in this field and change our view of the world how we communicate navigate and consume globally Questions of privacy authorship and economic interests are highly relevant to cartography's practices So how to deal with such powers and what is the critical role of cartography in it How might a bottom up perspective and actions in map making change the conception of a geopolitical space

Mapping Versatile Boundaries Regis Darques, 2016-09-10 This book demonstrates the pivotal role played by state confines in the geography of Balkan countries through powerful GIS and

remote sensing analyses It provides unique mapping perspectives on the Balkan region with over 140 illustrations The book is dedicated to applied historical and economic geographers as well as political scientists Because of its high fragmentation the Balkan area has not been studied on a systematic transnational basis The persistence of frozen and or open conflicts has also turned the border issue into an absolute taboo subject for the scientific community and civil society This results in an apparent chaos that most Western observers fail to understand
