HRIS is a comprehensive presentation on global HRIS implementations and the associated challenges faced in such global projects. In today's global economy, HR is changing fast and dives into areas such as strategy outsourcing, mergers and acquisitions, M&A. This book covers all these areas and other topics that are relevant to today's HR world, providing more value to the readers. It provides illustrations to assist readers in visualizing the topics discussed and in developing a sound understanding of the integration and data aspects of HRIS systems. This book will be useful as a text for a course in HRIS wherever prescribed for the MBA HR and MBA IT students. The book encourages self-directed study and thought process based on references provided at the end of each chapter and hence will also be useful to consultants, HR professionals and IT professionals working with HR departments.
