RAPIDLY PROGRESSIVE GLOMERULONEPHRITIS (RPGN)	11
HEMOLYTIC UREMIC SYNDROME (HUS)	12
SUMMARY	12

DEFINITION AND RECOGNITION OF HEMATURIA

• Hematuria

- A common issue faced by primary physicians who care for children
- While it can cause great anxiety in the patient and family when it presents grossly, rarely does hematuria alone herald a serious illness during childhood.
- Despite a thorough evaluation, no cause can be found in a large percentage of children who have hematuria.

• Microscopic hematuria

- Persistent presence of >5 RBCs/hpf in an uncentrifuged urine

• Macroscopic (gross) hematuria

- Blood or any discolored urine visible to the human eye
- A dramatic symptom usually brought to medical attention

• Evaluation of hematuria

- Nearly 40% of children who present with gross hematuria and 80% of patients with persistent isolated microscopic hematuria have no identifiable cause despite a thorough workup.
- Raises the question of how investigation should be performed on a child particularly if it is an isolated microscopic hematuria because the evaluation can be costly and, at times, invasive.
- How extensive an evaluation is appropriate depends much on the context.
- Children who are symptomatic and present with hematuria will deserve a thorough evaluation because they are the ones who are more likely to have an unidentifiable cause and include the subset that has an acute or potentially serious illness that can progress to significant morbidity or sequelae if not identified and treated.
 - This is where clinical judgment should be guided by a thorough history and physical examination.

Figure 1. Hematuria

• Dipstick test for blood

- Based on the peroxidase-like activity of hemoglobin
- Red cells are lysed on contact with a strip allowing free hemoglobin to catalyze the liberation of oxygen from organic peroxide.
- Tetramethylbenzidine is oxidized producing a color change from orange to green-blue.
- If intact red cells do not lyse, they may produce speckles on the pad.
- Sensitivity of dipsticks for hemoglobin: **0.015–0.062 mg/dL**.
 - This concentration corresponds to 5–21 RBCs/ μ L or 1–4 RBCs/hpf of concentrated urine sediment.

Figure 2. Dipstick test

• Normal excretion of blood in urine

- In healthy individuals, fewer than a thousand red cells are excreted in the urine per minute.
 - 3,000–4,000 RBCs/min = 2–3 RBCs/hpf
- Quantitative studies demonstrate that normal children can excrete as much as $\geq 500,000$ RBCs in a 12-hour period.
 - This increases with fever and/or exercise.

CLINICAL APPROACH TO PATIENTS WITH HEMATURIA

Figure 3. Simplified algorithm for hematuria

• Urinalysis: first step when presented with a patient with hematuria

- If no hemoglobin is found on macroscopic urinalysis, then other causes of urine discoloration need to be considered.

March Hematuria Manual Guide

Jill C. Cash, Cheryl A. Glass

March Hematuria Manual Guide:

Expert Guide to Sports Medicine Matthew Davis, 2005 A one stop reference on the management of sports injuries this is ideal for physicians who have not specialized in sports medicine It offers all of the practical guidance needed to diagnose sports related injuries treat patients in the ambulatory care setting if possible and refer them to a specialist if necessary

Adult-Gerontology Practice Guidelines Jill C. Cash, Cheryl A. Glass, 2015-06-26 Print CourseSmart

Manual of Neonatal Care John P. Cloherty, Eric C. Eichenwald, Anne R. Hansen, Ann R. Stark, 2012-01-05 This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal perinatal and neonatal care that have occurred since the sixth edition This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine as well as complex medical and surgical problems Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States the manual s outline format gives readers rapid access to large amounts of valuable information quickly The Children s Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28 000 newborns delivered annually The book also includes the popular appendices on topics such as common NICU medication guidelines the effects of maternal drugs on the fetus and the use of maternal medications during lactation Plus there are intubation sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format

The Youth Athlete Brian J. Krabak, M. Alison Brooks, 2023-06-22 The Youth Athlete A Practitioner s Guide to Providing Comprehensive Sports Medicine Care includes topics that provide the most comprehensive and holistic understanding of the youth athlete The foundation of the book focuses on the growth and development of the athlete from child to adolescence balancing their physical mental and emotional needs The middle sections expand on this foundation concentrating on common injuries and illnesses as well as unique topics e g Female Athlete Triad Sports Specialization Final sections emphasize specific sports e g Soccer Basketball eSports allowing the reader to synthesize the previous information to assist with return to play decision making Written from a scientific perspective and incorporating evidence based medicine into its content this book is perfect for health care practitioners of varied specialties The complete and comprehensive structure of the book will clearly distinguish it from all other textbooks on the market Covers diverse topics that reflect our current understanding of youth athletes and issues related to their care Incorporates evidence based approach highlighting the latest state of the art information and research Written by global content experts throughout the sports medicine field
