Placing the Enlightenment Charles W. J. Withers, 2008-09-15 The Enlightenment was the age in which the world became modern challenging tradition in favor of reason freedom and critical inquiry While many aspects of the Enlightenment have been rigorously scrutinized its origins and motivations its principal characters and defining features its legacy and modern relevance the geographical dimensions of the era have until now largely been ignored Placing the Enlightenment contends that the Age of Reason was not only a period of pioneering geographical investigation but also an age with spatial dimensions to its content and concerns Investigating the role space and location played in the creation and reception of Enlightenment ideas Charles W J Withers draws from the fields of art science history geography politics and religion to explore the legacies of Enlightenment national identity navigation discovery and knowledge Ultimately geography is revealed to be the source of much of the raw material from which philosophers fashioned theories of the human condition Lavishly illustrated and engagingly written Placing the Enlightenment will interest Enlightenment specialists from across the disciplines as well as any scholar curious about the role geography has played in the making of the modern world

Journal of a Dissenter Chris Wright, 2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as Marxism capitalism history many schools of modern philosophy psychology economics and contemporary American politics It also includes quite a few personal passages but I've kept those only because they express common experiences and youthful psychological tendencies Its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal's second half Ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44

Myths and Memories Cindy Lane, 2015-02-27 This book examines the perceptions of European travelling writers about southern Western Australia between 1850 and 1914 Theirs was a narrow vision of space and people in the region shaped by their individual personalities their position in society and the prevailing discourses and ideologies of the age Christian Enlightenment and Romantic philosophies had a major influence on their responses to the land its

cultivation and conservation and its aesthetic qualities and on their views of both indigenous and settler colonial society their class and assumptions of race and ethnicity The travelling men and women perpetuated an idealised view of a colonised landscape and a pioneer community that eliminated class struggle and inequality even though an analysis of their observations suggests otherwise Nevertheless although limited their narratives are invaluable as a reflection of opinions attitudes and knowledge prevalent during an age of imperialism Their perspectives reveal unique viewpoints that differ from those of immigrants who wrote about their hopes and fears in making a new life for themselves These travellers were economically secure literate and educated foundations which provide an insight into the way power and privilege implicit in their writings governed the way they imagined Western Australia in the colonial and immediate post federation period The tinted lenses through which European travelling writers narrowly observed space and people presented a mythical imagined sense of southern Western Australia *Events That Formed the Modern World* Frank W. Thackeray, John E.

How standards of living have skyrocketed since 1800 and the political philosophy that made it possible Persuasive richly detailed and erudite Financial Times There's little doubt that most humans today are better off than their forebears Stunningly so the economist and historian Deirdre McCloskey argues in this concluding volume of her trilogy celebrating the oft derided virtues of the bourgeoisie The poorest of humanity McCloskey shows will soon be joining the comparative riches of Japan and Sweden and Botswana Why Most

economists from Adam Smith and Karl Marx to Thomas Piketty say the Great Enrichment since 1800 came from accumulated capital McCloskey disagrees fiercely Our riches she argues were made not by piling brick on brick bank balance on bank balance but by piling idea on idea Capital was necessary but in the same way that oxygen is necessary for a fire Nor were institutions the drivers the World Bank orthodoxy of add institutions and stir hasn't worked McCloskey builds a powerful case for the initiating role of ideas ideas for electric motors and free elections of course but more deeply the bizarre and liberal ideas of equal liberty and dignity for ordinary folk Liberalism arose from theological and political revolutions in northwest Europe yielding a unique respect for betterment and its practitioners and upending ancient hierarchies Commoners were encouraged to have a go and the bourgeoisie took up the Bourgeois Deal and we were all enriched Few economists or historians write like McCloskey her ability to invest the facts of economic history with the urgency of a novel or of a leading case at law is unmatched She summarizes modern economics and modern economic history with verve and lucidity yet sees through to the really big scientific conclusion Not matter but ideas Big books don't come any more ambitious or captivating than Bourgeois Equality

Enduring Controversies in Military History Spencer C. Tucker, 2017-09-21 This provocative examination of major controversies in military history enables readers to learn how scholars approach controversial topics and provides a model for students in the study and discussion of other historical events Why did Alexander the Great's empire fall apart so soon after his death How did France win the Hundred Years War despite England winning its major battles Was slavery the primary cause of the American Civil War Would it have benefited the Allies militarily to have gone to war against Germany in 1938 rather than in 1939 Should women be allowed to serve in combat positions in the U S military All of these questions and many other historical controversies are addressed in this thought provoking reference book By exploring every angle of some of the most contentious debates involving military history this book builds students critical thinking skills by supplying a complete background of the controversial topic to provide context

and also by providing multiple perspective essays written by top scholars in the field The perspective essays present arguments for different positions on the controversy Readers will consider the cases for and against whether Hannibal should have marched on Rome after his momentous victory at Cannae whether the United States was justified in using the atomic bomb in Japan whether Adolf Hitler was primarily responsible for the Holocaust and whether torturing prisoners during the War on Terror is warranted among many other historical military debates

Gender, Society and Print Culture in Late-Stuart England Helen Berry, 2017-03-02 Focusing on a largely unknown type of popular print culture that developed in the late 1600s the coffee house periodical Helen Berry here offers new evidence that the politics of gender far from being a marginal or frivolous topic was an issue of general interest and wide spread concern to the early modern reader Berry's study provides the first full length analysis of John Dunton's Athenian Mercury 1691-97 an influential specimen of the coffee house periodical genre as well as the original question and answer publication which addressed both men's and women's issues in one journal As the chapter headings in this book indicate the topics addressed in the agony column of the Athenian Mercury for example the body courtship and sex are of enduring interest across the centuries Berry's study of this periodical provides new insights into the gendered ideas and debates that circulated among middling sorts in early modern England An historical survey of the social effects of mass communication in the early modern period this volume makes an important contribution to the ongoing study of how gendered ideas and values were communicated culturally particularly beyond the milieu of elite groups such as the nobility and gentry It argues that the mass media was from its infancy an important means of communicating powerful messages

about gender norms particularly among the middling sorts The study will appeal not only to historians women and gender studies scholars and literature scholars but also to scholars of publishing history

Fanaticism and the History of Philosophy Paul Katsafanas,2023-11-07 Voltaire called fanaticism the monster that pretends to be the child of religion Philosophers politicians and cultural critics have decried fanaticism and attempted to define the distinctive qualities of the fanatic whom Winston Churchill described as someone who can't change his mind and won't change the subject Yet despite fanaticism's role in the long history of social discord human conflict and political violence it remains a relatively neglected topic in the history of philosophy In this outstanding inquiry into the philosophical history of fanaticism a team of international contributors examine the topic from antiquity to the present day Organized into four sections topics covered include Fanaticism in ancient Greek Indian and Chinese philosophy Fanaticism and superstition from Hobbes to Hume including chapters on Locke and Montesquieu Shaftesbury and Hutcheson Kant Germaine de Stael Hegel Nietzsche William James and Jorge Portilla on fanaticism Fanaticism and terrorism and extremism and gender including the philosophy and morality of the manosphere Closed mindedness and political and epistemological fanaticism Spanning themes from superstition enthusiasm and misanthropy to the emotions purity and the need for certainty Fanaticism and the History of Philosophy is a landmark volume for anyone researching and teaching the history of philosophy particularly ethics and moral philosophy It is also a valuable resource for those studying fanaticism in related fields such as religion the history of political thought sociology and the history of ideas

Locke in America Jerome Huyler,1995 An account of the link between Locke's thought and the American Founding The author argues that previous writers have misread Locke's influence on the Founders he portrays the philosopher as a moderate 17th century moralist advocating an individualism that fits well with classic republicanism

Equality Darrin McMahon,2024-04-11 This fascinating and refreshing book is more necessary than ever A must read Thomas Piketty Fascinating New York Times WINNER OF THE 2024 JACQUES BARZUN PRIZE IN CULTURAL HISTORY Equality is in crisis Our world is filled with soaring inequalities spanning wealth race identity and nationality Yet how can we strive for equality if we don't understand it As much as we have struggled for equality we have always been profoundly sceptical about it How much do we want and for whom Darrin M McMahon's Equality is the definitive intellectual history tracing equality's global origins and spread from the dawn of humanity through the Enlightenment to today Equality has been reimagined continually in the great world religions and the politics of the ancient world by revolutionaries and socialists Nazis and fascists and post war reformers and activists A magisterial exploration of why equality matters and why we continue to reimagine it Equality offers all the tools to rethink equality anew for our own age

The Trouble with Ownership Jody Greene,2011-06-07 Copyright and intellectual property issues are intricately woven into any written work but the precise nature of this relationship has plagued authors printers and booksellers for centuries What does it mean to own the products of our intellectual labors in our own time And what was the meaning three centuries

ago when copyright laws were first put into place Jody Greene argues that while owning one's book is critical to the development of modern notions of authorship studies of authorial property rights have in fact lost sight of the most critical valence of owning in early modern England that is owning up to or taking responsibility for one's work Greene puts forth what she calls a paranoid theory of copyright under which literary property rights are a means of state regulation to assign responsibility for printed works to identify one person who will step forward and claim the work in exchange for the right to reap the benefits of the literary marketplace Blending research from legal historical and literary archives and drawing on the troubled authorial careers of figures such as Roger L Estrange Elizabeth Cellier Daniel Defoe John Gay and Alexander Pope *The Trouble with Ownership* looks to the literary culture of early modern England to reveal the intimate relationship between proprietary authorship and authorial liability Enlightened Colonialism Damien Tricoire, 2017-08-11 This book further qualifies the postcolonial thesis and shows its limits To reach these goals it links text analysis and political history on a global comparative scale Focusing on imperial agents their narratives of progress and their political aims and strategies it asks whether Enlightenment gave birth to a new colonialism between 1760 and 1820 Has Enlightenment provided the cultural and intellectual origins of modern colonialism For decades historians of political thought philosophy and literature have debated this question On one side many postcolonial authors believe that enlightened rationalism helped delegitimize non European cultures On the other side some historians of ideas and literature are willing to defend at least some eighteenth century philosophers whom they consider to have been anti colonialists Surprisingly enough both sides have focused on literary and philosophical texts but have rarely taken political and social practice into account
