Low Cost Shore Protection Low Cost Shore Protection:

Low Cost Shore Protection U. S. Army Corps of Engineers, 2004-07 This book is intended for property owners whose land is located on sheltered waters protected from direct action of open ocean waves As a reader you may be personally concerned about some aspect of shore protection because your house or cottage is threatened by continued erosion or a sandy beach you once enjoyed as disappeared Whatever your personal circumstances it is probably small comfort to know that your plight is shared by many others In trying to solve your problem you may have sought the advice of others or observed the means they have used to combat erosion problems Or you may have been approached by a local firm trying to sell either construction services or some shore protection device While such resources may sometimes achieve satisfactory results you and a majority of others are probably reading this because you have been unable to solve your problems and have suffered substantial capital losses in the process If such is the case then this report is for you Low Cost Shore Protection, 1981 This brochure has four main objectives First it briefly presents the natural processes that affect your shoreline property and the factors involved in erosion and erosion control Second it gives you information on types of low cost erosion control measures available to property owners whose waterfronts are threatened The third objective of the brochure is to help you with planning for shoreline erosion control Fourth the brochure is designed to give you sources for further information and assistance in making decisions and implementing them p 3 **Low Cost Shore Protection**, 1981 *Low Cost Shore Protection. A Property Owner's Guide* GAI CONSULTANTS INC MONROEVILLE PA., 1982 This report has four main objectives to acquaint you with the actual shoreline processes at work to explain available alternatives to review the entire decision process leading to an appropriate choice from among available options and to identify sources of additional help Discussion is limited to sheltered waters where low cost owner implemented shore protection can be successful Application to open coast sites experiencing the full force of oceanic waves is not intended and those who do so should realize the considerable chances for failure Applications of low cost methods to open coast sites are definitely not recommended The U S Army Corps of Engineers has produced this report as a public service While the methods described herein have been successfully utilized to slow or arrest erosion problems no method is successful in all cases Therefore the government cannot guarantee that any method described in this report will be successful in your case Low Cost Shore Protection United States. Army. Corps of Engineers, 1981 Low Cost Shore Protection GAI Consultants, Inc, 1981 **Low Cost Shore Protection** GAI Consultants, Inc, 1981 Low Cost Shore Protection for the Great Lakes University of Michigan. Lake Hydraulics Laboratory, 1952 **Low Cost Shore Protection - a Guide for Local Government Officials** GAI CONSULTANTS INC MONROEVILLE PA., 1981 This report is intended for planning regulatory and other local government officials whose duties include some involvement in shoreline erosion prevention measures The discussion is limited to the shorelines of sheltered waters that are not subject to the direct action of undiminished oceanic waves These would include

bays sounds tidal rivers and the Great Lakes Author **Low-cost Shore Protection on the Great Lakes** John M. Armstrong, 1976 Shore erosion is currently causing millions of dollars of damage to shoreline property along the great Lakes

1 2 Erosion is caused by the energy of waves and currents which are produced by large wind storms The erosion process on the Great Lakes is most severe when lake levels are near the top of their 6 foot 1 8 meter range for several years as is currently being experienced The severe erosion process continue even after lake levels fall as the bluffs have become unstable and waves from intense storms can still attack them In order to alleviate the erosion damages to beaches and bluffs shoreline owners must rely on shore protection methods Effective methods of shore protection are designed to slow or stop the erosion process by dissipating wave energy and or preventing bluff attack However the most effective methods are very expensive costing over 200 per foot 656 per meter of shoreline Costs are calculated for the purposes of this study as the length of shoreline which is expected to be protected by the shore protection methods For sites utilizing revetments artificial nourishment and seawalls the length is the stretch of shoreline actually covered by the method For locations utilizing groin systems and breakwaters the system was designed to protect the entire length of the sites the costs have been calculated on that basis Whether these systems actually protect that length of shoreline is to be determined by this study Shoreline homeowners are usually not able to meet such expenses and often resort to less efficient and costly alternatives Private shorelines owners need accurate reliable information about effective low cost shore protective methods in order to reduce or alleviate the severe erosion damages to their shorelines Villas & Vicinity, NJ, Interim Feasibility Study ,1998 *Shore Protection Planning and Design* United States. Beach Erosion Board, 1953 *Groins: an Annotated Bibliography* James H. Balsillie, Richard O.
