GSLIB Clayton V. Deutsch, André G. Journel, 1992 Collection of geostatistical routines for providing source code that serves as a starting point for custom programs advanced applications and research *Applied Geostatistics with SGeMS* Nicolas Remy, Alexandre Boucher, Jianbing Wu, 2011-04-14 The Stanford Geostatistical Modeling Software SGeMS is an open source computer package for solving problems involving spatially related variables It provides geostatistics practitioners with a user friendly interface an interactive 3 D visualization and a wide selection of algorithms This practical book provides a step by step guide to using SGeMS algorithms It explains the underlying theory demonstrates their implementation discusses their potential limitations and helps the user make an informed decision about the choice of one algorithm over another Users can complete complex tasks using the embedded scripting language and new algorithms can be developed and integrated through the SGeMS plug in mechanism SGeMS was the first software to provide algorithms for multiple point statistics and the book presents a discussion of the corresponding theory and applications Incorporating the full SGeMS software now available from www.cambridge.org 9781107403246 this book is a useful user guide for Earth Science graduates and researchers as well as practitioners of environmental mining and petroleum engineering **Solved Problems in Geostatistics** Oy Leuangthong, K. Daniel Khan, Clayton V. Deutsch, 2011-09-20 This unique book presents a learn by doing introduction to geostatistics Geostatistics provides the essential numerical tools for addressing research problems that are encountered in fields of study such as geology engineering and the earth sciences Illustrating key methods through both theoretical and practical exercises Solved Problems in Geostatistics is a valuable and well organized collection of worked out problems that allow the reader to master the statistical techniques for modeling data in the geological sciences The book's scope of coverage begins with the elements from statistics and probability that form the foundation of most geostatistical methodologies such as declustering debiasing methods and Monte Carlo simulation Next the authors delve into three fundamental areas in conventional geostatistics covariance and variogram functions kriging and Gaussian simulation Finally special topics are introduced through problems involving utility theory loss functions and multiple point geostatistics Each topic is treated in the same clearly organized format First an objective presents the main concepts that will be established in the section Next the background and assumptions are outlined supplying the comprehensive foundation that is necessary to begin work on the problem A solution plan demonstrates the steps and considerations that have to be taken when working with the exercise and the solution allows the reader to check their work Finally a remarks section highlights the overarching principles and noteworthy aspects of the problem Additional exercises are available via a related Web site which also includes data related to the book problems and software programs that facilitate their resolution Enforcing a truly hands on approach to the topic Solved Problems in Geostatistics is an indispensable supplement for courses on geostatistics and spatial statistics at the upper undergraduate and graduate levels It also serves as an applied reference for practicing

professionals in the geosciences **Geostatistics Banff 2004** Oy Leuangthong, Clayton V. Deutsch, 2008-01-24 The return of the congress to North America after 20 years of absence could not have been in a more ideal location The beauty of Banff and the many offerings of the Rocky Mountains was the perfect background for a week of interesting and innovative discussions on the past present and future of geostatistics The congress was well attended with approximately 200 delegates from 19 countries across six continents There was a broad spectrum of students and seasoned geostatisticians who shared their knowledge in many areas of study including mining petroleum and environmental applications You will find 119 papers in this two volume set All papers were presented at the congress and have been peer reviewed They are grouped by the different sessions that were held in Banff and are in the order of presentation These papers provide a permanent record of different theoretical perspectives from the last four years Not all of these ideas will stand the test of time and practice however their originality will endure The practical applications in these proceedings provide nuggets of wisdom to those struggling to apply geostatistics in the best possible way Students and practitioners will be digging through these papers for many years to come Oy Leuangthong Clayton V Deutsch ACKNOWLEDGMENTS We would like to thank the industry sponsors who contributed generously to the overall success and quality of the congress De Beers Canada Earth Decision Sciences Maptek Chile Ltda Mira Geoscience Nexen Inc Petro Canada Placer Dome Inc GSLIB Clayton V.
