The Dīpavaṃsa ,1879 **Autocar** ,1998 Microbial Processes National Academy of Sciences,2001-09
Microorganisms have simultaneously served and assaulted man throughout history Man is totally dependent on some
microbes for life processes while remaining subject to the destructive capacities of others in diseases not yet conquered
Microbes can be marshaled to aid in solving many important global problems including food shortages resource recovery and
reuse energy shortages and pollution Microbiology is particularly suited to make important contributions to human needs in
developing countries yet it has received comparatively little attention The range of possible applications covers uses by
individuals and industries in rural settings villages and cities This book covers examples of microbial processes that may be
useful in developing countries Although many of these processes may not have a direct and immediate use their scope and
diversity should serve to indicate the strong potential for microbial applications Dīpavaṃsa Hermann Oldenberg,1879

Phytoremediation David Tsao,2003-02-12 This volume provides a general overview of phytotechnologies Authors from
private industry academia the consulting community and regulatory agencies have all contributed to it Starting with the
basic processes and mechanisms occurring in the soil plant atmosphere continuum the typical applications of vegetation for
cleaning up and remediating contaminated sites are described Since the growth of vegetation is paramount to this
technology the factors within the subsurface environment affecting growth are discussed in detail as well These include the
processes and factors in the soil environment that affect the plant and the subsurface microbial community After these two
introductory chapters the most prevalent applications of phytotechnologies are reviewed These include vegetated systems for
treating organic and inorganic contaminants in solid media hydraulic systems for controlling and treating contaminant
groundwater plumes and vegetative covers for surface water protection and landfill leachate management Finally this
monograph concludes with a discussion of the regulatory implications of applying this technology towards the clean up and
remediation of contaminated sites worldwide Pages ix x **The Autocar** ,1988-06 Road and Track ,2002
