Green Infrastructure Finance Framework Report World Bank Studies:

Green Infrastructure Finance Aldo Baietti, The World Bank, 2012-06-06 The report estimated that **Green Infrastructure Finance** The World Bank, 2012-06-06 This report builds on the conclusions of the Green Infrastructure Finance Leading Initiatives and Research report and lays out a simple and elegant way in which scarce public financing can leverage market interest in greening infrastructure particularly in the East Asia and Pacific Region Green Infrastructure Finance Aldo Baietti, Andrey Shlyakhtenko, Roberto La Rocca, Urvaksh D. Patel, 2012-04-18 This report is a structured compendium of leading initiatives and activities put forward to accelerate private investment flows in green growth It summarizes current investment challenges of green projects as well as proposed solutions financing schemes and initiatives that have set the stage for scaling up green infrastructure investments *Green Infrastructure Finance* Aldo Baietti, 2012 Increasing concerns over the effects of climate change have heightened the importance of accelerating investments in green growth The International Energy Agency for example estimates that to reduce carbon dioxide emissions by 50 percent by 2050 global investments in the energy sector alone will need to total US 750 billion a year by 2030 and over US 1 6 trillion a year from 2030 2050 Despite global efforts to mobilize required capital flows the investments still fall far short Bloomberg New Energy Finance argues that by 2020 investments will be US 150 billion short from the levels required simply to stabilize CO2 emissions For the East Asia and Pacific region alone the World Bank study Winds of Change suggests that additional investments of US 80 billion a year over the next two decades are required Multiple factors affect green investments often rendering them financially not attractive Private investment flows therefore depend on public sectors interventions and support As in many countries public sector resources are scarce and spread across many competing commitments they need to be used judiciously and strategically to leverage sufficient private flows Many governments however still lack a clear comprehensive framework for assessing green investment climate and formulating an efficient mix of measures to accelerate green investments and are unfamiliar with international funding sources that can be tapped To address this challenge the World Bank with support from AusAID conducts the work on improving the financing opportunities for green infrastructure investments among its client countries This activity attempts to identify practical ways to value and monetize environmental externalities of investments and improve the promotion and bankability of green projects This research report as a key step in this activity provides a structured compendium of ongoing leading initiatives and activities designed to accelerate private investment flows in green growth It summarizes current investment challenges of green projects as well as proposed solutions financing schemes and instruments and initiatives that have set the stage for promoting green growth The results of this work are intended to benefit the international community and policymakers who are seeking to deepen their knowledge of green investment environment In addition it is hoped that this work will be useful to practitioners including fund managers and investors seeking to have a better understanding of current trends global initiatives and available funding

Programme, 2024-03-06 **Public Banks** Thomas Marois, 2021-06-10 Public banks are banks located within the public sphere of a state They are pervasive with more than 900 institutions worldwide and powerful with tens of trillions in assets Public banks are neither essentially good nor bad Rather they are dynamic institutions made and remade by contentious social forces As the first single authored book on public banks this timely intervention examines how these institutions can confront the crisis of climate finance and catalyse a green and just transition The author explores six case studies across the globe demonstrating that public banks have acquired the representative structures financial capacity institutional knowledge collaborative networks and geographical reach to tackle decarbonisation definancialisation and democratisation These institutions are not without contradictions torn as they are between contending public and private interests in class divided society Ultimately social forces and struggles shape how and if public banks serve the public good **Development Banks and Sustainability in the Andean Amazon** Rebecca Ray, Kevin P. Gallagher, Cynthia A. Sanborn, 2019-10-10 This book explores what development banks governments and communities have learned in the last decade of careful negotiation between social and environmental protections in the Andean Amazon and the pressures of a surging infrastructure and development boom While mega dams highways and ports are filling up the pipelines of planners the national governments of Andean and Amazon basin countries and major development banks have enacted ambitious social and environmental protections The book traces the development of social and environmental protections after years of struggle by affected communities going beyond official policies to discover how these reforms work in practice and ultimately whether they are enough to stem the risks of infrastructure mega projects As Chinese public banks play an increasingly important role in the region the book also demonstrates that there is a risk of governments undercutting their own standards By contrast this book shows that making infrastructure work for everyone involved requires mutually reinforcing networks of support and accountability among communities governments and development banks This book led by an expert multi disciplinary international team will be of considerable interest to researchers in the fields of development and development economics

geography anthropology and ecology as well as practitioners in development banks and in government regulatory and foreign aid agencies

The Green Infrastructure Finance Facility (GIFF) Concept Aldo Baietti, The proposed Green Infrastructure Finance Facility will be the implementing vehicle of the Framework which would subscribe an initial funding from international donors in order to support justifiable renewable energy projects With parallel support from host governments the facility would use its financial resources to close the financial viability gap of clean energy projects while at the same time ensuring a high leveraging of private finance in each of the projects it supports It will also deploy its instruments to reduce the risks associated with these technologies One of the novel features of this approach is the deliberate blending of both concessional and carbon finance instruments within individual project structures in order to achieve maximum effectiveness for bringing RE projects to financial closure with majority participation from the private sector
