Since 2010, a significant quantity of international climate change finance has begun to reach developing countries. However, the transfer of finance under the international climate change regime, the legal and ethical obligations that underpin it, the constraints on its use, its intended outcomes and its successes, failures and future potential constitutes a poorly understood topic. *Climate Change Finance and International Law* fills this gap in the legal scholarship. The book analyses the legal obligations of developed countries to financially support qualifying developing countries to pursue globally significant mitigation and adaptation outcomes, as well as the obligations of the latter under the international regime of financial support. Through case studies of climate finance mechanisms and a multitude of other sources, this book delivers a rich legal and empirical understanding of the implementation of states' climate finance obligations to date. The book will be of interest to scholars and students of international law and policy, international relations and the maturing field of climate change law. *Environmental and Nuclear Networks in the Global South* Isabella Alcañiz, 2016-08-18. The first comprehensive study to explain the workings of transgovernmental environmental and nuclear cooperation across the so-called Global South. *Mainstreaming Climate Change in Development Cooperation* Nicolien van der Grijp, 2010-04-29. Climate change, development and development cooperation are individually and jointly three politically sensitive complex issues, especially in the context of relations between developed and developing countries. This book tackles these issues by combining theoretical, political and practical perspectives, analysing the dominant paradigms and exploring the meaning of the concept of mainstreaming. At the practical level, it presents the results of case studies focusing on assistance provided by the European Union and key member states and the climate needs articulated by developing countries. At the political level, it highlights the sensitivities between developed and developing countries and examines the mainstreaming debate in various fora. This book is valuable for policymakers, academics, politicians and non-state actors working in the fields of development studies, international law, politics, international relations, economics, climate change and environmental studies. *Routledge Handbook of Latin America in the World* Jorge Domínguez, Ana Covarrubias, 2014-10-17. The *Handbook of Latin America in the World* explains how Latin American countries have both reacted and contributed to changing international dynamics over the last 30 years. It provides a comprehensive picture of Latin America's global engagement by looking at specific processes and issues that link governments and other actors social and economic within the region and beyond. Leading scholars offer an up-to-date state of the field, theoretically and empirically, thus avoiding a narrow descriptive approach. The *Handbook* includes a section on theoretical approaches that analyze Latin America's place in the international political and economic system and its foreign policy making. Other sections focus on the main countries

actors and issues in Latin America's international relations. In so doing, the book sheds light on the complexity of the international relations of selected countries and on their efforts to act multilaterally. *The Routledge Handbook of Latin America in the World* is a must-have reference for academics, researchers, and students in the fields of Latin American politics, international relations, and area specialists of all regions of the world.

The *De Gruyter Handbook of Sustainable Development and Finance* explores the difficult and challenging issues confronting society and the environment in the contexts of unprecedented climate change, biodiversity loss, and the global pandemic. In this seminal text exploring a wide range of topics and in the devastating wake of COVID-19, scholars and practitioners analyse the effectiveness of current and proposed actions to build a sustainable future and the public and private finance necessary to prevent an impending planetary catastrophe. The first section of the handbook introduces readers to the origins and evolution of sustainable development. An examination of public and private finance follows in the next two sections, presented from the perspectives of authors from both developed and developing countries. Climate change, one of the largest sectors of finance for sustainable development, is investigated in detail, as is the new and emerging development frontier, the blue economy of the world's oceans. Suitable for students, policymakers, and the public at large, the handbook highlights the lessons learned and points the way forward for sustainable development and finance in the wake of the global pandemic and the challenges to come.

Leaving Fossil Fuels Underground Joyeeta Gupta, Barbara Hogenboom, Arthur Rempel, Malin Olofsson, 2025-10-01. How can the world move away from a century-old global system based on fossil fuels? And how can societies in the Global South and Global North overcome the deeply vested economic, financial, and political interests of the fossil fuel system? Despite the alarming effects of climate change and three decades of international climate negotiations, industrialized countries continue to exploit new fossil fuel reserves. Many countries in the Global South follow suit and still engage in large new fossil fuel projects and their related pollution, social injustice, and debts. Increasingly, however, social and political actors are mobilising for leaving fossil fuels underground (LFFU). This book examines the role of key actors, arguments, and approaches in promoting the much-needed rapid phase-out of fossil fuels. It addresses the importance of linking effective climate action to socially and ecologically inclusive development. In addition to local resistance, the book explores initiatives for national and international policies and financial mechanisms carried out by actors ranging from social movements to governments and large investors. In *Leaving Fossil Fuels Underground*, an international team of well-established scholars and early-career researchers takes a global perspective to demonstrate the challenges and possibilities of reaching this goal. They

In-depth explorations are given to topics such as climate change, multinational corporations, international agreements, and UN organizations, regulations, and business standards, trade, and international finance, multilevel and transnational governance, and ecological citizenship. *Handbook of Global Environmental Politics, Second Edition* is a comprehensive review of the field and offers cutting-edge ideas for further research. Banking on Beijing Axel Dreher, Andreas Fuchs, Bradley Parks, Austin Strange, Michael J. Tierney, 2022-05-05. China is now the lender of first resort for much of the developing world, but Beijing has fueled speculation among policymakers, scholars, and journalists by shrouding its grant-giving and lending activities in secrecy. Introducing a systematic and transparent method of tracking Chinese development projects around the world, this book explains Beijing's motives and analyzes the intended and unintended effects of its overseas investments. Whereas China almost exclusively provided aid during the twentieth century, its twenty-first century transition from benefactor to banker has had far-reaching impacts in low-income and middle-income countries that are not widely understood. Its use of debt rather than aid to bankroll big-ticket infrastructure projects creates new opportunities for developing countries to achieve rapid socio-economic gains, but it has also introduced major risks such as corruption, political capture, and conflict. This book will be of interest to policymakers, students, and scholars of international political economy, Chinese politics, and foreign policy, economic development, and international relations.
