Humanitarianism and the Quantification of Human Needs Joël Glasman, 2019-12-06 This book provides a historical inquiry into the quantification of needs in humanitarian assistance. Needs are increasingly seen as the lowest common denominator of humanity. Standard definitions of basic needs, however, set a minimalist version of humanity, both in the sense that they are narrow in what they compare and that they set a low bar for satisfaction. The book argues that we cannot understand humanitarian governance if

we do not understand how humanitarian agencies made human suffering commensurable across borders in the first place The book identifies four basic elements of needs As a concept as a system of classification and triage as a material apparatus and as a set of standards Drawing on a range of archival sources including the United Nations Refugee Agency UNHCR M decins sans Fronti res MSF and the Sphere Project the book traces the concept of needs from its emergence in the 1960s right through to the present day and United Nations Secretary General Ban Ki moon s call for evidence based humanitarianism Finally the book assesses how the international governmentality of needs has played out in a recent humanitarian crisis drawing on field research on Central African refugees in the Cameroonian borderland in 2014 2016 This important historical inquiry into the universal nature of human suffering will be an important read for humanitarian researchers and practitioners as well as readers with an interest in international history and development The Introduction Conclusion and Chapters 1 4 5 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
