advancement of digital media and the medium of communication in recent years there is a widespread interest in digital entertainment. An emerging technical research area, edutainment or educational entertainment, has been accepted as education using digital entertainment. Edutainment has been recognized as an effective way of learning using modern digital media tools like computers, games, mobile phones, televisions, or other virtual reality applications which emphasizes the use of entertainment with application to the education domain. The Edutainment conference series was established in 2006 and subsequently organized as a special event for researchers working in this new interest area of e-learning and digital entertainment. The main purpose of Edutainment conferences is to facilitate the discussion, presentation, and information exchange of the scientific and technological development in the new community. The Edutainment conference series becomes a valuable opportunity for researchers, engineers, and graduate students to communicate at these international annual events. The conference series includes plenary invited talks, workshops, tutorials, paper presentation tracks, and panel discussions. The Edutainment conference series was initiated in Hangzhou, China, in 2006. Following the success of the first event, the second Edutainment 2007 was held in Hong Kong, China; the third Edutainment 2008 was held in Nanjing, China; and the fourth edition, Edutainment 2009, was held in Banff, Canada. Edutainment 2010 was held during August 16-18, 2010, in Changchun, China. Two workshops were jointly organized together with Edutainment 2010.

Tomorrow's Learning: Involving Everyone. Learning with and about Technologies and Computing Arthur Tatnall, Mary Webb, 2018-01-25. This book constitutes the refereed post-conference proceedings of the 11th IFIP TC 3 World Conference on Computers in Education, WCCE 2017, held in Dublin, Ireland, in July 2017. The 57 revised full papers and 10 short papers were carefully reviewed and selected from 116 submissions during two rounds of reviewing and improvement. The papers are organized in the following topical sections: futures of technology for learning and education; innovative practices with learning technologies and computer science education; and its future focus and development. Also included is The Dublin Declaration, which identifies key aspects of innovation, development, successes, concerns, and interests in relation to ICT and education.

Digital Touch Carey Jewitt, Sara Price, 2024-05-29. Touch matters. It is fundamental to how we know ourselves and each other, and it is central to how we communicate. Digital touch is embedded in many technologies, from wearable devices and gaming hardware to tactile robots and future technologies. What would it be like if we could hug or touch digitally across distance? How might this shape our sense of connection? How might we establish trust or protect our privacy and safety? Digital Touch is a timely and original book that addresses such questions. Offering a rich account of digital touch, the book introduces the key issues and debates, as well as the design and ethical challenges raised by digital touch. Using clear, accessible examples and creative scenarios, the book shows how touch—how we touch, as well as what, whom, and when we touch—is being profoundly reshaped by our use of technologies. Above all, it highlights the importance of digital touch in our daily lives and how it will impact our relationships and way of life in the future. The first work of its kind, Digital Touch is the go-to book for anyone wanting to get to grips with
