## Home Thoughts On Belonging:

Thinking about Belonging in Youth Studies Anita Harris, Hernan Cuervo, Johanna Wyn, 2021-07-22 This book takes a global perspective to address the concept of belonging in youth studies interrogating its emergence as a reoccurring theme in the literature and elucidating its benefits and shortcomings While belonging offers new alignments across previously divergent approaches to youth studies its pervasiveness in the field has led to criticism that it means both everything and nothing and thus requires deeper analysis to be of enduring value The authors do this work to provide an accessible scholarly account of how youth studies uses belonging by focusing on transitions participation citizenship and mobility to address its theoretical and historical underpinnings and its prevalence in youth policy and research

**Belonging and Estrangement in the Poetry of Philip Larkin, R.S. Thomas and Charles Causley** Rory Waterman, 2016-04-22 Focusing on the significance of place connection and relationship in three poets who are seldom considered in conjunction Rory Waterman argues that Philip Larkin R S Thomas and Charles Causley epitomize many of the emotional and societal shifts and mores of their age Waterman looks at the foundations underpinning their poetry the attempts of all three to forge a sense of belonging with or separateness from their readers the poets varying responses to their geographical and cultural origins the belonging and estrangement that inheres in relationships including marriage the forced estrangements of war the antagonism between social belonging and a need for isolation and finally the charged issues of faith and mortality in an increasingly secularized country

*Emotions and Belonging in Forced Migration* Basem Mahmud, 2021-09-27 *Emotions and Belonging in Forced Migration* takes a sociology of emotions approach to gain a better understanding of the present situation of forced migration Furthermore it helps to bring the voices and views of forced migrants to academic and public debates in Western society where they have been generally absent and often investigated with predefined concepts and categories based on theories having little relevance to their cultural and social experiences This work however is based on an inductive methodology that carefully carries the voices of forced migrants throughout the research Therefore it will be of interest for various audiences from different disciplines in social sciences as for any readers seeking to learn more about the refugees in his building neighbourhood city or country Finally it provides an insightful lens for those who want to know more about Syria and the Arab uprisings after 2010 It is the first study of what Syrians feel during the entirety of their difficult ordeal fleeing Syria traversing different countries in the global South and landing in Western ones No other book treats this thematic focus with the same geographic and temporal breadth

A Philosophy of Belonging James Greenaway,2023-08-15 James Greenaway offers a philosophical guide to understanding affirming and valuing the significance of belonging across personal political and historical dimensions of existence A sense of belonging is one of the most meaningful experiences of anyone s life Inversely the discovery that one does not belong can be one of the most upsetting experiences In A Philosophy of Belonging Greenaway treats the notion of belonging as an intrinsically philosophical one After all belonging raises intense questions of personal self understanding identity mortality and longing it confronts interpersonal sociopolitical and historical problems and it probes our relationship with both the knowable world and transcendent mystery Experiences of alienation exclusion and despair become conspicuous only because we are already moved by a primordial desire to belong Greenaway presents a hermeneutical framework that brings the intelligibility of belonging into focus and discusses the works of various representative thinkers in light of this hermeneutic The study is divided into two main parts Presence and Communion In the first Greenaway considers the abiding presence of the cosmos as the context of personhood and the world followed by the presence of persons to themselves and others by way of consciousness and embodiment culminating in a discussion of the unrestricted horizon of meaning that love makes present in persons In the second part belonging in community is explored as a crucial type of communion that is both politically and historically structured Moreover communion has direction and a quality of sacredness that offers itself for consideration Greenaway concludes with a discussion of the consequences of refusing presence and communion and what is involved in the repudiation of belonging

**Thinking Through Loneliness** Diane Enns, 2022-04-21 This is the peculiar paradox of loneliness I am unseen yet I feel exposed as though my most internal suffering were on public display as though I am disclosing to the world the vulnerability it does not want to see By reflecting on the experience of loneliness through the author's own life the narratives of others and analyses from Arendt to Berardi Thinking Through Loneliness explores the ambiguities of being alone It seeks to defy the reductionist tendencies of the current loneliness experts looking beyond loneliness as a collective health crisis to consider what it tells us about our great need for one another and what happens when we fail to meet this need Our social needs vary however to investigate loneliness is to inquire into the contradictions of the human condition we are alone and together separate and attached which gives rise to the need for individuality on the one hand and for intimacy on the other To be lonely is to suffer from an unfulfilled desire to be close to others But we can also suffer from an unfulfilled desire to be separate from others Diane Enns explores how loneliness might be an inescapable dimension of human existence but also the collective symptom of social failure The lonely are not to blame for their distress they are witnesses to the failure of our contemporary social world dramatically transformed in recent decades by digital technology and changes in how we work love socialize and live together in households neighbourhoods and cities Enns argues it is crucial to recognise the structural conditions economic political institutional technological that give rise to the isolation that produces loneliness Only then can we work to undermine these conditions preserving all that is best about human social life **Home Thoughts from**

**Abroad** Risa Domb, 1995 Here is the first critique of modern Hebrew literature to examine the vital concept of place through which we learn about some of the pressing concerns and issues of contemporary Israelis The geographical shift in Jewish existence from west to east culminating in the establishment of the State of Israel in 1948 corresponded to a shift from an existence outside time and space to an existence within space From that movement arose a dialectical tension between Israel and Europe home and abroad While the first generation of Hebrew writers in Israel looked inward to Israel subsequent Israeli writers began to move their protagonists abroad especially to Europe The renewed encounter provoked admiration and attraction as well as hostility and repulsion Some protagonists escaped to others from Europe for both Europe is not just a tourist site but a world of difference from Israel Europe is also presented as a challenge to the culture of the Israeli born

Sabra It is easier to ask fundamental questions about the nature of the whole Israeli national enterprise when the characters are moved away to look back from afar In many contemporary novels Israeli protagonists go abroad are displaced away from the narrow confines of their existence at home The issue of movement has become linked with that of identity This book focuses on six novels in which characters leave Israel but then return manifesting the tension between home and abroad in the dialectics of outside and inside This allows the authors to use place on a thematic as well as a structural level Thus Europe often assumes a metaphoric or alternatively a metonymic function Places may also be presented by contrasting their analogous descriptions or their social and cultural aspects Finally place may be used to analyse the soul for external place images can reveal the inner reaches of the psyche How to Belong Belinda A. Stillion Southard,2018-10-05 In How to Belong Belinda Stillion Southard examines how women leaders throughout the world have asserted their rhetorical agency in troubling economic social and political conditions Rather than utilizing the concept of citizenship to bolster political influence the women in the case studies presented here rely on the power of relationships to create a more habitable world With the rise of global capitalism many nation states that have profited from invigorated flows of capital have also responded to the threat of increased human mobility by heightening national citizenship's exclusionary power Through a series of case studies that include women grassroots protesters a woman president and a woman United Nations director Stillion Southard analyzes several examples of women all as embodied subjects in a particular transnational context pushing back against this often violent rise in nationalist rhetoric While scholars have typically used the concept of citizenship to explain what it means to belong Stillion Southard instead shows how these women have reimagined belonging in ways that have enabled them to create national regional and global communities As part of a broader conversation centered on exposing the violence of national citizenship and proposing ways of rejecting that violence this book seeks to provide answers through the powerful rhetorical practices of resilient and inspiring women who have successfully negotiated what it means to belong to be included and to enact change beyond the boundaries of citizenship **The Price of Belonging: Perspectives from Asia**,2023-04-17 To belong often involves the performance of burdensome obligations the sacrifice or suppression of personal desires for the collective good and the demand for demonstrating lifelong loyalty Belonging may also entail hidden threats risks and pressures that lurk in the corners of familiarity These are the key aspects that The Price of Belonging explores in detail by bringing together nine original ethnographic case studies from across Asia and the Asian diaspora By shedding light on the adverse facets of belonging the book challenges its overly idealistic depictions and offers a differentiated look at this social practice **Excursions** Michael Jackson,2007-10-24 Philosophical meditations on a series of journeys the author has taken to various places around the world **Thinking Home** Sanja Bahun,Bojana Petric,2020-06-07 Thinking Home challenges and extends the existing scholarship on the subject of home in a period which has seen unprecedented levels of movement cross the globe Sanja Bahun and Bojana Petric have collated essays that revisit existing ideas to introduce new

ways of thinking on home from the individual and local through communal to the international levels While home informs our feelings of belonging and displacement and our activities such as migration housing and language learning Bahun Petric and contributors look to specific under studied areas and encompass them within a major framework that allows for assessment through multiple disciplinary and expressive lenses Thinking Home examines examples such as temporary homes homes on the road new and emergent modes of home making and minority groups in home and housing debates Fresh timely and topical Thinking Home is rooted in activism and policy making in the sector of home the essays both challenge and extend the existing scholarship on this subject This collection combines perspectives of aesthetics anthropology cultural and literary studies law linguistics philosophy sociology psychoanalysis political science and activist responses in one whole It will be essential reading for students of anthropology literary studies cultural studies and philosophy **Luria. **Dramatic lyrics. Dramatic romances** Robert Browning, 1912 *Heidegger and Homecoming* Robert Mugerauer, 2008-01-01 Martin Heidegger's philosophical works devoted themselves to challenging previously held ontological notions of what constitutes being and much of his work focused on how beings interact within particular spatial locations Frequently Heidegger used the motifs of homelessness and homecoming in order to express such spatial interactions and despite early and continued recognition of the importance of homelessness and homecoming this is the first sustained study of these motifs in his later works Utilizing both literary and philosophical analysis Heidegger and Homecoming reveals the deep figural unity of the German philosopher's writings by exploring not only these homecoming and homelessness motifs but also the six distinctive voices that structure the apparent disorder of his works In this illuminating and comprehensive study Robert Mugerauer argues that these motifs and Heidegger's many voices are required to overcome and replace conventional and linear methods of logic and representation Making use of material that has been both neglected and yet to be translated into English Heidegger and Homecoming explains the elaborate means with which Heidegger proposed that humans are able to open themselves to others while at the same time preserve their self identity

Contested Identities Roger Nicholson, Gertrud Szamosi, Claudia Marquis, 2015-09-04 This volume brings together essays that individually and collectively address the force of the literary text with regard to problematic identities They work out of shared concerns with literary representations of this issue in different regions nations and communities that often prove divided they pursue questions related to textual identity where the literary text itself is contested internally or in its generic and historical relations In sum these studies actively test identity as social or literary concept discovering in difference the very condition of a useful if paradoxical sense of personal or textual coherence What happens to us when we move between different cultures or different societies defined in geographical or historical terms What happens to texts and textual practices in these same circumstances What happens to us when we are obliged to adapt to a new social order Homi Bhabha speaks of cultural difference as calling into play what he calls cultural translation What happens to identity the narrative that

fashions a continued sense of self in this case Difference raised to alterity demands that we accord functional and philosophical value not just to other aspects but also to the aspect of the other At the level of personal or textual agency however difference contests and threatens to subvert stable selfhood composing a scene of conflict Even so it often proves to be instrumental in re charging a sense of the cultural valence of the literary text not least by virtue of its political implications In this regard the border where difference materialises has considerable presence in contributions to this volume prompting appreciation of texts that work on or travel across such borders however haphazardly and dangerously but also those that compose border textualities
