Building Modern Antiquity Georgia Giannakopoulou, 2024-11-29 This book considers post 19th century Athens as a unique instance of a secret side of metropolitan capitalism With a focus on modern antiquity as the hidden element of the dialectic between the past and the present it suggests that the sociological study of one of the great European capital cities a city not intended as a modern capital and its architectural representations may expose part of the veiled processes of the reconstruction of the past thus shedding light on the abuse of antiquity for the celebration of European capitalist metropolitan modernity From the glorious white marble cityscape of the 19th century that aimed at re-enchanting metropolitan modernity to the inglorious grey reinforced concrete 21st century metropolis modern Athens exposes the battle between the modern and a modern image of antiquity a false socially constructed historiography born of the dialectics between the ancient and the modern the new and the old collective memory and collective forgetting As such The Building of a Modern Antiquity will appeal to scholars of sociology with interests in social and critical theory urban

studies sociology of architecture and visual sociology **Towards a Dialogical History of Modern Architecture** Jorge Francisco Liernur, 2024-07-15 The book challenges three perspectives on the modern architectural canon explanations that disregard impacts and effects beyond the North Atlantic monologic superficial modifications that simply add Other figures to the canon and views that reject the canon itself Instead it recognizes the canon s significance in comprehending architecture while seeking to uncover its presumed Western centric integrity through a shift from a monological to a dialogical approach This approach integrates concepts of identity and Otherness as dialectically articulated and mutually interrelated In essence the book s main thesis contends that the canon s historiographic construction overlooked the existence of Otherness specifically neglecting the world beyond the North Atlantic nucleus of the West By examining a global context to comprehend the canon formation the book proposes a more accurate understanding of the history of modern architecture Recognizing that this task cannot emanate from a single hegemonic center it presents the prospect of a coral type architectural history This narrative should and could encompass voices from diverse cultures to explore the particular circumstances of the world intertwined with each piece or figure transiently integrated into that canon As a result the ideal readers of this book position themselves within multiple settings keen on engaging in a critical global conversation about modern architectural discourse It will be of interest to researchers and students of architecture architectural history and cultural studies *Resisting Postmodern Architecture* Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography **Architecture and the Right to Heal** Esra Akcan, 2025-10-03 Esra Akcan explores architecture s role in the healing processes that take place following socioeconomic political and

A System's Evaluation of Global History of Indian Architecture Joy Sen, 2016-12-02 Deep within an inner cave *guhahitam* of our existence remains our potential Divinity It is the place where our reflected sentient being the First Bird is trying to probe into to recover the hidden sun The allegory is evident in the parable of the Cave once preached by the Upanishads and later by the Greek philosopher Plato The probe is to push forward the First Bird to surge higher in the resplendent celestial blue under the full radiance of the Solar world which is the Second resulting in an explosion of an infinite all pervading Divinity Till the union and the rapture is attained there are the two Birds one the psychic being which is within us and the other one which is the direct portion of the Divine The direct portion is constantly trying to guide and work within us so that evolution goes on and on In the words of Sri Aurobindo it is the *haitya Purusha* the direct portion of the Divine in the human which is working incessantly till the rapture is activated Ancient roots are evident in the ancient *Swetaswatara Upanishad* hailed by the primordial Sage *Kapila* and coded originally in a later text called the *Bhagabat Purana* The *haitya Purusha* is also the being that is behind the *Chitta* Sri Aurobindo says Millenniums later the inspired Architects in the most ancient of all Buddhist ages had carved out the sacred idea in form of rock cut expressions called the *Chaitya* hall As the *Mahayana Sutra* of the foremost *Shurangama* at the Crown of the Great Buddha says the way of practicing the *Samadhi* is not singular and its actual method of cultivation depends upon the functioning of mind and mental concomitants *Citta Chaitya pravritti* of each being and their interconnectedness *Mahat* It is in the recovery or a re tracing of the two as a DIVINITY that is originally ONE an individual's journey called evolution and a collective journey called civilization itself are sustained It is also from the deeper embedded patterns of this journey the gems of the system's foundation can be quarried

Coslett, 2019-07-02 Architectural relics of nineteenth and twentieth century colonialism dot cityscapes throughout our globalizing world just as built traces of colonialism remain embedded within the urban fabric of many European capitals *Neocolonialism and Built Heritage* addresses the sustained presence and influence of historic built environments and processes inherited from colonialism within the contemporary lives of cities in Africa Asia and Europe Novel in their focused consideration of ways in which these built environments reinforce neocolonialist connections among former colonies and colonizers states and international organizations the volume's case studies engage highly relevant issues such as historic preservation heritage management tourism toponymy and cultural imperialism Interrogating the life of the past in the present authors thus challenge readers to consider the roles played by a diversity of historic built environments in the ongoing asymmetrical balance of power and unequal distribution capital around the globe They present buildings maintenance management reuse and re interpretation

and in so doing they raise important questions the ramifications of which transcend the specifics of the individual sites and architectural histories they present

Immaterial Architecture Jonathan Hill, 2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill s explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice *Architecture and Building* ,1897
