**Greening Trade and Investment** Eric Neumayer, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company      **Greening Trade and Investment** Eric Neumayer, 2017-09-25 A comprehensive critical analysis of the interactions between investment trade and the environment It examines the consequences of existing multilateral investment and trade regimes including the WTO and the MAI for the environment and asks how they should be reformed to protect it In doing so the text shows how these regimes can be greened without erecting protectionist barriers to trade that frustrate the development aspirations of poorer countries The solution seeks to offer a way out of one of the most difficult dilemmas in international policy how investment and trade can protect the environment without encouraging protectionism by the industrialized world      Gary Bryner, *The Historical Dictionary of Environmentalism* strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries

**Greening through Trade** Sikina Jinnah, Jean-Frederic Morin, 2020-03-03 How the environmental provisions in US preferential trade agreements affect both the environmental policies of trading partners and the effectiveness of multilateral environmental agreements As trade negotiations within the World Trade Organization seem permanently stalled countries turn increasingly to preferential trade agreements PTAs between smaller groups of nations Many of these PTAs incorporate environmental provisions some of which require trading partners to enact new domestic environmental laws and use the enforcement mechanisms available within trade agreements as tools for environmental protection In *Greening through Trade* Sikina Jinnah and Jean Fr d ric Morin provide the first detailed examination of how the environmental provisions in US preferential trade agreements affect both the environmental policies of trading partners and the effectiveness of multilateral environmental agreements They do so through a combination of in depth qualitative case studies and quantitative analysis of an original dataset of 688 global PTAs Jinnah and Morin explore the effects of linkages between PTAs and environmental treaties and the diffusion of environmental norms and policy through PTAs Centrally they argue that US trade agreements can serve as mechanisms both to export environmental policies to trading partner nations and third party countries and to enhance the effectiveness of multilateral environmental agreements by strengthening their enforcement capacity They caution that PTAs are not a panacea for environmental governance deeper problems of unsustainable consumption and differential power dynamics between trading partners must be carefully navigated in deploying trade agreements for environmental protection      *The New Accountability* Michael Mason, 2012-05-23 The growth of pollution that crosses national borders represents a significant threat to human health and ecological sustainability Various international agreements exist between countries to reduce risks to their populations however there is often a mismatch between national

territories of state responsibility and transboundary hazards All too often state priorities do not correspond to the priorities of the people affected by pollution who often have little recourse against major polluters particularly transnational corporations operating across national boundaries Drawing on case studies The New Accountability provides a fresh understanding of democratic accountability for transboundary and global harm and argues that environmental responsibility should be established in open public discussions about harm and risk Most critically it makes the case that regardless of nationality affected parties should be able to demand that polluters and harm producers be held accountable for their actions and if necessary provide reparations
