Rita Assoreira Almendra,2025-01-30 This book explores various

pedagogical viewpoints and dialectical positions within the field of design education and the concept of proximity it has established with industries and manufacturing Which Proximity in Design Education frames a wide range of approaches in design studios on undergraduate graduate and postgraduate levels and their capacity to render meaningful and novel attitudes and actions beyond the classroom The urgent call for resilience in the way we lead our lives has brought our global boundaries and social tensions to the forefront of the conversation and there is a generation of students fully aware of our collective responsibility in this decisive decade As such educators need to rapidly adapt to new tools and ways of teaching design whilst also being challenged on how to educate the designer for the pressing tasks of the near future It presents optimistic solutions for how education can support renovated mindsets and efforts towards common goals This book contains distinct visions of the world and its problems relating to proximity in design education As such the chapters present diversified solutions to these issues which will be of interest to teachers and researchers working in design education

Different Perspectives in Design Thinking Yvonne Eriksson, 2022-03-02 Globalization and digitalization are buzz words in contemporary society They affect both our private and our professional lives Society has become more diverse with easier access to information and to virtual platforms that gives us opportunity to be in touch with colleagues friends family etc at any time A complex environment is emerging wherein internet of things and big data are being integrated with products production systems healthcare and daily activity and play an important part in decision making This has an impact on future designs and the role of designers Responsible designers with a holistic perspective are needed The book highlights several aspects of design thinking such as Information Design and Critical Design The meaning of culture gender and disabilities are also discussed The functions of Information Design are changing from showing the way instruction manuals and graphic design It will affect among others healthcare technology smart products and Industry 4.0 Design thinking perspective that includes users from the entire chain and from the producer to the end user of the product or service is needed This will also require gender and culture issues to be taken into consideration in designing products and services Design thinking methods and critical aspects of design will contribute to an inclusive society
