The Economics of Green Growth Shunsuke Managi, 2015-06-05. The Economics of Green

Growth investigates the possibility of creating an integrated indicator covering three pillars of sustainable development economy society and the environment The excessive pursuit of economic efficiency has resulted in severe environmental problems such as climate change and biodiversity loss and societal human issues such as inequality and disparity The book aims to change the direction of economic growth towards one which is more sustainable It explores beyond the conventional indicator the GDP that measures economic growth and human well being It also introduces new indicators relevant to sustainable development and a green economy and discusses the key issues for these indicators *Green Growth* Gareth Dale,Manu V. Mathai,Jose A. Puppim de Oliveira,2016-02-15 The discourse of green growth has recently gained ground in environmental governance deliberations and policy proposals It is presented as a fresh and innovative agenda centred on the deployment of engineering sophistication managerial acumen and market mechanisms to redress the environmental and social derelictions of the existing development model But the green growth project is deeply inadequate whether assessed against criteria of social justice or the achievement of sustainable economic life upon a materially finite planet This volume outlines three main lines of critique First it traces the development of the green growth discourse quaideology It asks what explains modern society s investment in it why has it emerged as a master concept in the contemporary conjuncture and what social forces does it serve Second it unpicks and explains the contradictions within a series of prominent green growth projects Finally it weighs up the merits and demerits of alternative strategies and policies asking the vital question if not green growth then what

Export Product Quality, Renewable Energy, and Sustainable Production Umer Shahzad,Gagan Deep Sharma,Lianbiao Cui,John Mendy,2023-09-12 Economic development has long been acknowledged for its beneficial effects on human well being In the context of economic globalization and vertical specialization increasing the quality of export products is more critical and necessary to export success and sustainable development The product s quality is inextricably linked to its manufacture and production which need various types of energy and raw materials Meanwhile the adoption of more environmentally friendly and cleaner energy sources contributes to the achievement of sustainable production Therefore product quality may provide a new perspective from which to investigate the systematic relationship between greener and renewable energy sources sustainable production and environmental regulations as well as the nature of export competitiveness Generally export product quality has referred to the quality of manufactured products within the product lines Quality refers to the relative price of a country s varieties within their respective product lines Product sophistication assesses the composition of the aggregate exports Different varieties of same product as per quality level are being produced by several developing and emerging economies Within any given product line quality converges both conditionally and unconditionally to the world s benchmark increases in institutional quality and human capital are associated with faster quality upgrading In turn faster growth in quality is associated with more rapid output growth
