Metal: C _____ Wood: I _____ Plastic: I _____ Copper: C _____ Paper: I _____ Air: I _____	Find the speed of a bike that travels 120 meters in 20 seconds. $S = D/T = 120\text{ m}/20\text{ sec} = 6\text{ m/s}$ A car starts 10 m away, then drives to 210 meters away in 40 seconds. How fast did they drive? $S = D/T$ <i>but D is really ΔD, change of distance.</i> $\text{So } S = \Delta D/\Delta T = 200\text{ m}/40\text{ sec} = 5\text{ m/s}$ What force results in 5 m/s^2 of acceleration to a 1.5 kg mass? $F = ma = (1.5\text{ kg}) \times (5\text{ m/s}^2) = 7.5\text{ N}$ A car speeds to 250 mph in 50 seconds. Calculate acceleration. $a = \Delta D/\Delta T = 250\text{ mph}/50\text{ sec} = 5\text{ mph/sec}$
Experimental or Control Variables			
You would not change these in the experiment: <i>Control</i>		You are trying to find out if snow shoes help a car stop or more.	
You would vary this to figure out how it works: <i>Experimental</i>		The amount of snow: <i>CV</i>	
You should have only one of these: <i>Experimented</i>		The car used: <i>CV</i>	
All the other variables are: <i>CV</i>		The type of tire: <i>EV</i> (only thing that varies)	
Position vs. Time			
Where was the object at 2 seconds? 4 meters			
When did the object reach 4 meters? 2 seconds			
Find the slope of the graph (must show work): Slope = $\text{rise/run} = \Delta y/\Delta x$ $\Delta y = 7 - 4 = 3\text{ m}$ slope = $\Delta y/\Delta x = 3\text{ m/s}$ $\Delta x = 2 - 1 = 1\text{ sec}$			
What does the slope you just found stand for? speed			
A girl is ice skating and has 25 kg/m/s of momentum. After she bumps into a friend, she has 25 kg/m/s of momentum. How much did she give her friend? Use Law of Conservation of Momentum: $25 - 25 = 0\text{ kg/m/s}$			

Which has more inertia: a bus, or a baller? Why? The bus has more mass. Which has more momentum: a bus or a fast airplane? Why? A bus is not moving ($v = 0$) vs $p = 0$ A 5 N book rests on a table. Why doesn't it fall? Newton's 3rd law—table pushes back with $=$ and opposite 5N force. When an astronaut lands on the moon, does his mass change? No, mass is not dependent on gravity. Does his weight change? Does his inertia change? Yes, weight is dependent on gravity. No, inertia depends on mass. Which of Newton's Three Laws Applies? 1. _____ A rocket moves forward because it pushes out gases from the back. 1. _____ It is hard to push a car, then hard to stop it. 2. _____ A 50 N force gives more acceleration to a 5 kg object than a 10 kg object.	Using $g = 10\text{ m/s}^2$, find the weight of a 5 kg mass. $F_w = mg = (5\text{ kg})(10\text{ m/s}^2) = 50\text{ N}$ A person walks 5 m/s for 60 seconds. How far did they walk? $S = D/T$ $D = S \times 60 = 300\text{ m}$ or, $D = ST$ A 45 N force pulls to the left and friction is 15 N. Find the net force: $45\text{N} - 15\text{N} = 30\text{ N}$ to the left What acceleration will the above net force give a 3 kg mass? $F = ma$ $a = F/D = 10\text{ m/s}^2$ or, $30\text{N} = 3a$

Action Gravity Jeff Lee, 2021-02-09 The Cause of Gravity The Holy Grail of all Scientific Revelation For over four centuries now Natural Philosophers and Theoretical Physicists have been desperately searching for the answer to that elusive and intractable question that is still hanging around today What is the true cause of Gravity The present day view by Theoretical Physics Academia is that gravity can be described as curved or warped space or spacetime So how does this space or spacetime curve or warp Do certain particles of space get closer together in one vicinity of space and further apart in another Are there compressions and rarefactions in space like there are in air How can empty space form a path for a moving object to travel through if it is completely empty The answer is that Space is NOT empty According to a brand new type of physics called Reality Physics we now know that space is not empty but contains an active plenum structure that is continually being created by the active two dimensional outward motion of Time with Space What this actually means is that the Now Point in Time expands outward into space with an active two dimensional omnidirectional omnipositional displacement at the Speed of Light or c 299 792 458 meters per second and that it also forms an inertial reference background pressure density throughout the universe We find that by placing a body of mass into this active inertial reference background pressure density we can create a vicinity of less active pressure density at that location where the mass is located This would obviously cause the greater pressure density surrounding the mass to implode with an accelerating motion down towards the surface of the mass body where the pressure density is less We call this implosively accelerating motion of the inertial reference background Gravitational Acceleration and this is what actually causes small objects to fall to the ground at the surface of the large body of mass Gravity is an action not a curvature or warpage of anything and therefore it must be caused by an action as revealed here by ACTION GRAVITY of Reality Physics

Is the Gravity an Energy Source of the Future? the Answer Is Movses Mikaeljan, 2019-04-10 This book is intended for a wide range of readers who are interested in this topic and who have natural scientific and technical knowledge This study there are no assumptions that go beyond classical science and the known knowledge about the nature of things The simplicity of the presentation of the material was chosen according to the principle of Occam s razor to show with a simple and

understandable example the possibility that has been hidden from us until now which is in our environment or as a physicist would say in a force field in which we are Based on the laws of generally accepted classical physics including the fact that the earth and its gravitational field have a central and homogeneous character on its surface here a mathematically exactly calculated theory is constructed step by step which is substantiated by physics without any assumptions It is about the possibility of using the gravitational field of the earth for performing useful mechanical work Upon first consideration it seem almost unthinkable However a closer look changes the preconceived notion without harming physics Based on this theory the state of the art of industry is now able to design and produce environmentally neutral power plants of any capacity which can be solve the current energy problems of the world population It can preserve non renewable resources of our planet and protect our ecology It s old good physics It is harder to crack prejudice than an atom Albert Einstein

Introduction to Gravity Strings Mark Fennell, 2015-05-29 For the first time in history the physical nature of gravity is truly understood For centuries people have asked what exactly is gravity Today we have an answer This elegant and simple model will be presented in this book All concepts are explained in simple language with intuitive analogies and several illustrations This model has been taught successfully to high school students and adults from various nations as well as many other curious individuals Gravity has been measured and calculated but to state what gravity is as a physical entity has perplexed scientists for generations Until now For the first time anywhere you will read the solutions regarding the true nature of gravity In this book we explain the physical properties and physical processes of gravity These physical descriptions work for all situations involving gravity without any limits It is also very easy to understand and very easy to use This model is more than just a useful tool it is in fact the very real very physical entity which is gravity This understanding of gravity will become the foundation for all studies related to gravity in the future The Gravity Strings model can explain all aspects of gravity and do things which no other model of gravity can do Some of these include

- 1 The Gravity Strings Model can explain all known characteristics of gravity These characteristics include gravitational effects over long distances weakest of known energies correlation between mass and gravitational energy mechanism of mutual gravitational pull potential versus kinetic gravitational energy rate of gravitational pull and the cause of gravitational acceleration
- 2 The Gravity Strings Model works at all scales from quantum to galaxies No other model of gravity can claim this
- 3 The Gravity Strings Model has been tested in numerous situations involving gravity and has proved 100% successful in every situation
- 4 The Gravity Strings Model can explain all measurements and calculations of gravity in any location
- 5 The Gravity Strings Model co exists easily with Newtonian equations of gravity
- 6 The Gravity Strings Model can easily explain orbits black holes and gravitational bending of light And this model can explain these processes much more easily than General Relativity
- 7 The Gravity Strings Model explains numerous processes involving electromagnetic energy and atomic structure
- 8 The Gravity Strings Model allows gravitational energy to be merged with electric and magnetic energy This has never been done successfully before
- 9 The

Gravity Strings Model can lead us to a successful Unified Field Theory I have already developed such a Unified Field Theory

10 The Gravity Strings Model is easy to understand and easy to use The model is far more intuitive to understand and easier to work with than any other model of gravity

11 The Gravity Strings Model is simple and elegant These are features which most prominent scientists agree make for the best and most convincing support for a theory Therefore because this model is so simple so elegant and is able to explain every situation regarding gravity this model will certainly be seen as correct physical understanding of gravitational energy Many eminent scientists have stated that of all models proposed for any phenomenon the model which is the simplest the most elegant and at the same time explains the most observations is most likely to be the correct model The new model of Gravity Strings is such a model

Gravity Chris Woodford, 2004 Despite gravity's importance people have started to understand it only in the last three hundred years or so Before the seventeenth century astronomers had little idea what kept the planets in orbit and no idea that it was the same force that made objects fall to Earth This book traces the history of discoveries about gravity from ancient beliefs about the universe to modern day research into black holes

Gravity from a New Angle Karunakar Marasakatla, 2009-08-01 Gravity from a New Angle is a comprehensive analysis of fundamental concepts in Physics Concepts like force work power and energy were developed over a period of centuries In depth analysis of these concepts reveals that there is overlap in the way these concepts were defined As a result the concept of resultant force obscured the true understanding of energy interactions Solution to most intriguing problems in Physics like Pioneer anomaly and unified theory relies on answers to the very basic questions Does an object retain its mass when it collapses to a point mass What is the amount of gravity at the center of the earth In a chemical reaction between carbon and oxygen to form CO₂ which atom releases the energy Object gains mass or gravity when it collapses to a point size Earth exerts enormous amount of gravity on an object kept at its center Contrary to the wide spread belief the energy in a combustion comes from the oxygen atom which we should call as the fuel not the carbon atom The flaws in fundamental concepts like the mass and force led our understanding of physical phenomenon in a wrong direction By redefining these basic concepts in accordance with the observed facts we can explain all the observed facts in a unified way
