Building Modern Antiquity Georgia Giannakopoulou, 2024-11-29 This book considers post 19th century Athens as a unique instance of a secret side of metropolitan capitalism With a focus on modern antiquity as the hidden element of the dialectic between the past and the present it suggests that the sociological study of one of the great European capital cities a city not intended as a modern capital and its architectural representations may expose part of the veiled processes of the reconstruction of the past thus shedding light on the abuse of antiquity for the celebration of European capitalist metropolitan modernity From the glorious white marble cityscape of the 19th century that aimed at re-enchanting metropolitan modernity to the inglorious grey reinforced concrete 21st century metropolis modern Athens exposes the battle between the modern and a modern image of antiquity a false socially constructed historiography born of the dialectics between the ancient and the modern the new and the old collective memory and collective forgetting As such The Building of a Modern Antiquity will appeal to scholars of sociology with interests in social and critical theory urban

studies sociology of architecture and visual sociology Towards a Dialogical History of Modern Architecture Jorge Francisco Liernur, 2024-07-15 The book challenges three perspectives on the modern architectural canon explanations that disregard impacts and effects beyond the North Atlantic monologic superficial modifications that simply add Other figures to the canon and views that reject the canon itself Instead it recognizes the canon s significance in comprehending architecture while seeking to uncover its presumed Western centric integrity through a shift from a monological to a dialogical approach This approach integrates concepts of identity and Otherness as dialectically articulated and mutually interrelated In essence the book s main thesis contends that the canon s historiographic construction overlooked the existence of Otherness specifically neglecting the world beyond the North Atlantic nucleus of the West By examining a global context to comprehend the canon formation the book proposes a more accurate understanding of the history of modern architecture Recognizing that this task cannot emanate from a single hegemonic center it presents the prospect of a coral type architectural history This narrative should and could encompass voices from diverse cultures to explore the particular circumstances of the world intertwined with each piece or figure transiently integrated into that canon As a result the ideal readers of this book position themselves within multiple settings keen on engaging in a critical global conversation about modern architectural discourse It will be of interest to researchers and students of architecture architectural history and cultural studies **Resisting Postmodern Architecture** Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography Architecture and the Right to Heal Esra Akcan, 2025-10-03 Esra Akcan explores architecture s role in the healing processes that take place following socioeconomic political and

environmental disasters *Modern Architecture and the Mediterranean* Jean-Francois Lejeune, Michelangelo Sabatino, 2009-12-04 Considering the influence of the forms and tectonics of the Mediterranean vernacular on modern architectural practice and discourse from the 1920s to the 1960s From Doxiadis' Theory to Pikionis' Work Kostas Tsiambaos, 2017-09-22 In this book Tsiambaos redefines the ground breaking theory of Greek architect and town planner Constantinos A Doxiadis *The Form of Space in Ancient Greece* and moves his thesis away from antiquity and ancient architecture instead arguing that it can only be understood as a theory founded in modernity In light of this the author explores Doxiadis theory in relation to the work of the controversial Greek architect Dimitris Pikionis This parallel investigation of the philosophical content of Doxiadis theory and the design principles of Pikionis work establishes a new frame of reference and creates a valuable and original interpretation of their work Using innovative cross disciplinary tools and methods which expand the historical boundaries of interwar modernism the book restructures the ground of an alternative modernity that looks towards the future through a mirror that reflects the ancient past *From Doxiadis Theory to Pikionis Work Reflections of Antiquity in Modern Architecture* is fascinating reading for all scholars and students with an interest in modernism and antiquity the history and theory of architecture the history of ideas and aesthetics or town planning theory and design **Third World Modernism** Duanfang Lu, 2010-11-02 This set of essays challenge interpretations of the development of modernist architecture in Third World countries during the Cold War The topics look at modernism's part in the transnational development of building technologies and the construction of national and cultural identity **Cities in Crisis** Jörg Knieling, Frank Othengrafen, 2015-09-16 In recent years European societies and territories have witnessed the spatial impacts of a severe financial and socio economic crisis This book builds on the current debate concerning how cities and urban regions and their citizens deal with the consequences of the recent financial and socio economic crisis *Cities in Crisis* examines the political and administrative implications of austerity measures applied in southern European cities These include cuts in local public spending and the processes of privatization of local public assets as well as issues related to the re scaling recentralization or decentralization of competencies Attention is paid to the rise of new austerity regimes the question of their legitimacy and their spatial manifestations and in particular to the social consequences of austerity The contributions to this book lay the foundation for recommendations on how to improve and consolidate qualified governance arrangements in order to better address rapid economic and social changes Such recommendations are applicable to cities and urban regions both within and outside of Europe It identifies possible approaches tools and partnerships to tackle the effects of the crisis and to prepare European cities for future challenges A Global History of Architecture Mark M. Architectural Thought Ben Farmer, Dr Hentie J Louw, Hentie Louw, Adrian Napper, 2003-09-02 Architecture has attracted increasing worldwide attention in recent years not only because of its cultural significance but also because of concern over the performance and resource implications of buildings 101 in depth articles by international scholars and practitioners bring the subject into focus by examining issues from various viewpoints Please contact your representative for a leaflet detailing full contents and contributors It also includes sample pages and several illustrations from the book *A History of Architecture in all Countries, Volumes 1 and 2* James Fergusson, 2023-11-02 James Fergusson's A History of Architecture in all Countries Volumes 1 and 2 is a monumental survey that takes readers on a journey through architectural styles traditions and innovations from diverse cultures around the globe Written with a meticulous attention to detail Fergusson employs a clear and engaging narrative style underpinned by rich illustrations and historical context The work not only documents the evolution of architectural practices from ancient to modern times but also rigorously analyzes the influences of geography culture and technology on the built environment Fergusson's pioneering approach makes this text a significant contribution to the field of architectural history positioning it amidst the shifting paradigms of 19th century scholarship Fergusson a Scottish architect and architectural historian was notably influenced by his travels across Europe and Asia His first hand observations and scholarly curiosity enabled him to approach architecture from a comparative and holistic perspective By intertwining art society and engineering he aspired to provide a comprehensive account that transcended mere stylistic categorization setting a new standard for architectural histories Fergusson's expertise reflects the historical context of his time where the appreciation for non Western architectures began to grow This exhaustive tome is indispensable for anyone

passionate about architecture history or cultural studies Scholars students and enthusiasts alike will find in Fergusson's work not only a rich resource of knowledge but also a lens through which the interconnectedness of global architectural heritage can be deeply appreciated Dive into Fergusson's eloquent prose and discover the stories behind structures that define our historical landscape A System's Evaluation of Global History of Indian Architecture Joy Sen, 2016-12-02 Deep within an inner cave guhahitam of our existence remains our potential Divinity It is the place where our reflected sentient being the First Bird is trying to probe into to recover the hidden sun The allegory is evident in the parable of the Cave once preached by the Upanishads and later by the Greek philosopher Plato The probe is to push forward the First Bird to surge higher in the resplendent celestial blue under the full radiance of the Solar world which is the Second resulting in an explosion of an infinite all pervading Divinity Till the union and the rapture is attained there are the two Birds one the psychic being which is within us and the other one which is the direct portion of the Divine The direct portion is constantly trying to guide and work within us so that evolution goes on and on In the words of Sri Aurobindo it is the haitya Purusha the direct portion of the Divine in the human which is working incessantly till the rapture is activated Ancient roots are evident in the ancient Svetasvatara Upanishad hailed by the primordial Sage Kapila and coded originally in a later text called the Bhagabat Purana The haitya Purusha is also the being that is behind the Chitta Sri Aurobindo says Millenniums later the inspired Architects in the most ancient of all Buddhist ages had carved out the sacred idea in form of rock cut expressions called the Chaitya hall As the Mahayana Sutra of the foremost Shurangama at the Crown of the Great Buddha says the way of practicing the Samadhi is not singular and its actual method of cultivation depends upon the functioning of mind and mental concomitants Citta Chaitya pravritti of each being and their interconnectedness Mahat It is in the recovery or a re tracing of the two as a DIVINITY that is originally ONE an individual's journey called evolution and a collective journey called civilization itself are sustained It is also from the deeper embedded patterns of this journey the gems of the system's foundation can be quarried

Neocolonialism and Built Heritage Daniel E. Coslett, 2019-07-02 Architectural relics of nineteenth and twentieth century colonialism dot cityscapes throughout our globalizing world just as built traces of colonialism remain embedded within the urban fabric of many European capitals Neocolonialism and Built Heritage addresses the sustained presence and influence of historic built environments and processes inherited from colonialism within the contemporary lives of cities in Africa Asia and Europe Novel in their focused consideration of ways in which these built environments reinforce neocolonialist connections among former colonies and colonizers states and international organizations the volume's case studies engage highly relevant issues such as historic preservation heritage management tourism toponymy and cultural imperialism Interrogating the life of the past in the present authors thus challenge readers to consider the roles played by a diversity of historic built environments in the ongoing asymmetrical balance of power and unequal distribution capital around the globe They present buildings maintenance management reuse and re interpretation and in so doing they raise important

questions the ramifications of which transcend the specifics of the individual sites and architectural histories they present

The Beautiful Country Stephanie Malia Hom, 2015-02-05 Every year Italy swells with millions of tourists who infuse the economy with billions of dollars and almost outnumber Italians themselves In fact Italy has been a model tourist destination for longer than it has been a modern state The Beautiful Country explores the enduring popularity of destination Italy and its role in the development of the global mass tourism industry Stephanie Malia Hom tracks the evolution of this particular touristic imaginary through texts practices and spaces beginning with the guidebooks that frame Italy as an idealized land of leisure and finishing with destination Italy's replication around the world Today more tourists encounter Italy through places like Las Vegas's The Venetian Hotel and Casino or Dubai's Mercato shopping mall than experience the country in Italy itself Using an interdisciplinary methodology that includes archival research ethnographic fieldwork literary criticism and spatial analysis The Beautiful Country reveals destination Italy's paramount role in the creation of modern mass tourism

Typology Emanuel Christ, Christoph Gantenbein, Victoria Easton, 2015 Emanuel Christ and Christoph Gantenbein together with their teaching staff and students at ETH Zurich expanded their research on building typology to four more metropolises again in Europe Latin America and Asia 180 buildings were analyzed over the past two years to find inspiration and models that can be adapted for the local context of any given city Each example is documented with an image site and floor plans axonometric projection key data and a brief description An introduction and four essays on the interaction between various protagonists and in particular the effect of governing local building regulation again show the potential for contemporary urban architecture The result is again a rich sourcebook of great practical value for students lecturers and practitioners of architecture Note de l'éditeur *Architecture and the Urban Environment* Derek Thomas, 2007-06-01 This well illustrated text forms a critical appraisal of the place and direction of architecture and urban design in a new world order at the start of the 21st century The book defines architectural and environmental goals for the New Age by analysing recent contemporary work for its responsiveness to important social and environmental issues and comparing it to successful precedents in architecture It argues that this new sustainable approach to architecture should be recognised as a new development of mainstream architectural history This practical guide illustrates current social and natural resource issues to aid architects in their approach to future design Environmental economics is presented as a potential bridge over the divide between the expectations of the business sector and the concerns of environmental lobbies Through examples and case studies an accessible analysis of carefully researched data drawn from primary sources over four continents allows the author to outline the current urgency for architects and urban designers to respond with real commitment to current and future changing contexts This book expresses a holistic vision and proposes a value system in response to the diagnosis It includes sound architectural and environmental ethics end user involvement in the design process and technological advances aimed at sustainable resource use Includes international case studies from Europe North America the Developing world including

South Africa South America and Central Asia *Immaterial Architecture* Jonathan Hill, 2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture. Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates. This issue drives Hill's explorative look at the immaterial aspects of architecture. The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter, command of drawing and design of spaces and surfaces. Focusing on immaterial architecture as the perceived absence of matter, Hill devises new means to explore the creativity of both the user and the architect, advocating an architecture that fuses the immaterial and the material and considers its consequences, challenging preconceptions about architecture, its practice, purpose, matter and use. This is a useful and innovative read that encourages architects and students to think beyond established theory and practice.
