Modules Cheryl Cisero Durwin, Marla Reese-Weber, 2016-12-01 Now with SAGE Publications Cheryl Cisero Durwin and Marla Reese Weber's *EdPsych Modules* uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies: early childhood, elementary, middle school, and secondary, and ends with Assess and Reflect and Evaluate questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text.

Behavioral Science & Policy: Volume 3, Issue 2 Craig R. Fox, Sim B. Sitkin, 2018-06-19 The success of nearly all public and private sector policies hinges on the behavior of individuals, groups, and organizations. Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of *Behavioral Science Policy* is broad, with topics spanning health care, financial decisionmaking, energy, and the environment, education and culture, justice and ethics, and workplace practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective. Jesus, Skepticism, and

the Problem of History Zondervan, 2019-10-08 In recent years a number of New Testament scholars engaged in academic historical Jesus studies have concluded that such scholarship cannot yield secure and illuminating conclusions about its subject, arguing that the search for a historically authentic Jesus has run aground. *Jesus, Skepticism, and the Problem of History* brings together a stellar lineup of New Testament scholars who contend that historical Jesus scholarship is far from dead. These scholars all find value in using the tools of contemporary historical methods in the study of Jesus and Christian origins. While the skeptical use of criteria to fashion a Jesus contrary to the one portrayed in the Gospels is methodologically unsound and theologically unacceptable, these criteria properly formulated and applied yield positive results that support the Gospel accounts and the historical narrative in Acts. This book presents a nuanced and vitally needed alternative to the skeptical extremes of revisionist Jesus scholarship that on the one hand uses historical methods to call into question the Jesus of the Gospels and on the other denies the possibility of using historical methods to learn about Jesus. *Educational*
