Green Intelligence Creating Environments That Protect Human Health:

Green Intelligence John Wargo, 2009-09-29 We live in a world awash in manmade chemicals from the pesticides on our front lawns to the diesel exhaust in the air we breathe Although experts are beginning to understand the potential dangers of these substances there are still more than 80 000 synthetic compounds that have not been sufficiently tested to interpret their effects on human health Yale University professor John Wargo has spent much of his career researching the impact of chemical exposures on women and children In this book he explains the origins of society s profound misunderstanding of everyday chemical hazards and offers a practical path toward developing greater green intelligence Despite the rising trend in environmental awareness information about synthetic substances is often unavailable distorted kept secret or presented in a way that prevents citizens from acting to reduce threats to their health and the environment By examining the histories of five hazardous technologies and practices Wargo finds remarkable patterns in the delayed discovery of dangers and explains the governments failures to manage them effectively Sobering yet eminently readable Wargo s book ultimately offers a clear vision for a safer future through prevention transparency and awareness

Courtyard Housing for Health and Happiness Donia Zhang, 2016-03-09 Health and happiness are fundamental to human quality of life The United Nations World Happiness Report 2012 reflects a new worldwide call for governments to include happiness as a criterion to their policies The Healthy Cities or Happy Cities movement has been endorsed by the WHO since 1986 and a Healthy House or Happy Home is a critical constituent of a healthy city or a happy city Nevertheless the concept has not been fully explored Existing literature on the healthy house has often focused on the technical economic environmental or biochemical aspects while current scholarship on the happy home commonly centers on interior decoration Few studies have addressed the importance of social and cultural factors that affect the health and happiness of the occupants Identifying four key themes in Chinese philosophy to promote health and happiness at home this

book links architecture with Chinese philosophy social sciences and the humanities and in doing so argues that Architectural Multiculturalism is a vital ideology to guide housing design in North America Using both qualitative and quantitative evidence gathered from ethnic Chinese and non Chinese living in the USA and Canada the study proposes that the Courtyard is a central component to promote social and cultural health and happiness of residents It further details courtyard garden house design strategies that combine a sense of privacy with a feeling of community as represented in courtyard housing The schemes may have universal implications Lessons from the Clean Air Act Ann Carlson,Dallas Burtraw,2019-05-09

Examines the successes and failures of the Clean Air Act in order to lay a foundation for future energy policy

A History of Radioecology Patrick C. Kangas,2022-12-26 This book presents a history of radioecology from World War II through to the critical years of the Cold War finishing with a discussion of recent developments and future implications for the field Drawing on a vast array of primary sources the book reviews synthesizes and discusses the implications of the ecological research supported by the Atomic Energy Commission AEC of the United States government from World War II to the early 1970s This was a critical period in the history of ecology characterized by

a transition from the older largely descriptive studies of communities of plants and animals to the modern form of the science involving functional studies of energy flow and mineral cycling in ecosystems This transition was in large part due to the development of radioecology which was a by product of the Cold War and the need to understand and predict the consequences of a nuclear war that was planned but has never occurred The book draws on important case studies such as the Pacific Proving Grounds the Nevada Test Site El Verde in Puerto Rico the Brookhaven National Laboratory and recent events such as the nuclear disasters at Chernobyl and Fukushima By revisiting studies and archived information from the Cold War era this book offers lessons from the history of radioecology to provide background and perspective for understanding possible present day impacts from issues of radiation risks associated with nuclear power generation and waste disposal Post Cold War developments in radioecology will be also reviewed and contrasted with the AEC supported ecology research for further perspectives This book will be of great interest to students and scholars of radioecology environmental pollution environmental technology bioscience and environmental history

Hershauer, George Basile, 2011-10-20 This three volume set is a landmark comprehensive overview of the business of sustainability providing 56 separate chapters from leaders in business non profit organizations and from within the academic and policy world In today s business environment garbage isn t simply worthless refuse to be disposed of anymore it often represents a material with monetary value The human population is using up about 30 percent more natural resources in one year than the earth can regenerate Because businesses constitute half of the world s largest economies there can be no sustainability without sustainable businesses The Business of Sustainability Trends Policies Practices and Stories of Success is a foundation set that effectively captures and articulates the why what who and how of sustainability and business Volume I covers the scientific economic and social underpinnings of sustainability and identifies the challenges facing business leaders Volume II explores the global network of designers producers suppliers distributors and consumers that must be addressed as a unit from a cradle to cradle life cycle perspective Volume III presents examples of success across many industries demonstrating that sustainability is indeed possible Each volume analytically addresses the larger issues such as the challenges of managing a business to the standards of sustainability measuring progress or success and creating and maintaining sustainable businesses This monumental work provides a comprehensive treatment of sustainability in the world of businesses exploring all of its dimensions obstacles metrics opportunities and pathways to success

Disability Studies and the Environmental Humanities Sarah Jaquette Ray, Jay Sibara, 2017-06-01 Although scholars in the environmental humanities have been exploring the dichotomy between wild and built environments for several years few have focused on the field of disability studies a discipline that enlists the contingency between environments and bodies as a foundation of its scholarship On the other hand scholars in disability studies have demonstrated the ways in which the built environment privileges some bodies and minds over others yet they

have rarely examined the ways in which toxic environments engender chronic illness and disability or how environmental illnesses disrupt dominant paradigms for scrutinizing disability. Designed as a reader for undergraduate and graduate courses in Disability Studies and the Environmental Humanities, it employs interdisciplinary perspectives to examine such issues as slow violence, imperialism, race toxicity, eco sickness, the body in environmental justice, ableism, and other topics. With a historical scope spanning the seventeenth century to the present, this collection not only presents the foundational documents informing this intersection of fields but also showcases the most current work, making it an indispensable reference.

The Power of Narrative in Environmental Networks Raul Lejano, Merrill Ingram, Helen Ingram, 2013-07-26. Theory and case studies demonstrate the analytic potential of mutually constitutive narrative networks in environmental governance.

Ecosystem Crises: Interactions Merrill Singer, 2021-03-11. Explores the human impacts on the environment that lead to serious ecological crises; an innovative resource for students, professionals, and researchers alike.

Ecosystem Crises: Interaction, Human Health, and the Changing Environment provides a timely and innovative framework for understanding how negative human activity impacts the environment and how seemingly disparate factors connect to and magnify hazardous consequences under a changing climate. Presenting a coherent, holistic perspective to the subject, this compelling textbook and reference examines the diverse, often unexpected links that connect our complex world in the context of global climate change. The text illustrates how eco-crisis interaction, the synergistic interface of two or more environmental events or pollutants, can multiply to produce harmful health effects that are greater than their additive impact. This concept is highlighted through numerous real and relatable examples, from the use of sediment rock in hydraulic and drinking water filtration systems to the connections between human development and crises such as deforestation, emergent infectious diseases, and global food insecurity. Throughout the text, specific examples present opportunities to consider broader questions about the extinction of species populations and ways of life. Presenting a balanced investigation of the interaction of contemporary ecological dangers, human behavior, and health, this unique resource explores how complex interactions between global warming and anthropogenic impairments magnify the diverse ecological perils and threats facing humans and other species. Discusses roadblocks to addressing environmental risk, such as global elite polluters, the organized denial of climate change, and deliberate environmental disruption for financial gain. Describes how the production and use of fossil fuels are driving a significant rise in carbon dioxide and other pollutants in the atmosphere and in the oceans. Illustrates how industrial production is contributing to an array of environmental crises, including fuel spills, waste leakages, and loss of biodiversity. Examines the critical ecosystems that are at risk from interacting stressors of human origin.

Ecosystem Crises: Interaction, Human Health, and the Changing Environment is an ideal textbook for advanced undergraduate and graduate students in courses including public and allied health, environmental studies, medical ecology, medical anthropology, and geo health, and a valuable reference for researchers, practitioners, and policy makers in fields such as environmental health, global, and

planetary health public health climate change and medical social science

Chemical Lands David D. Vail, 2018 An exploration of the elaborate relationship between farmers aerial sprayers agriculturalists crop pests chemicals and the environment The controversies in the 1960s and 1970s that swirled around indiscriminate use of agricultural chemicals their long term ecological harm versus food production benefits were sparked and clarified by biologist Rachel Carson's *Silent Spring* 1962 This seminal publication challenged long held assumptions concerning the industrial might of American agriculture while sounding an alarm for the damaging persistence of pesticides especially chlorinated hydrocarbons such as DDT in the larger environment In *Chemical Lands: Pesticides Aerial Spraying and Health in North America's Grasslands* since 1945 David D Vail shows however that a distinctly regional view of agricultural health evolved His analysis reveals a particularly strong ethic in the North American grasslands where practitioners sought to understand and deploy insecticides and herbicides by designing local scientific experiments engineering more precise aircraft sprayers developing more narrowly specific chemicals and planting targeted test crops Their efforts to link the science of toxicology with environmental health reveal how the practitioners of pesticides evaluated potential hazards in the agricultural landscape while recognizing the production benefits of controlled spraying *Chemical Lands* adds to a growing list of books on toxins in the American landscape This study provides a unique Grasslands perspective of the Ag pilots weed scientists and farmers who struggled to navigate novel technologies for spray planes and in the development of new herbicides insecticides while striving to manage and mitigate threats to human health and the environment

Energy Islands Catalina M de Onís, 2021-06-15 *Energy Islands* provides an urgent and nuanced portrait of collective action that resists racial capitalism colonialism and climate disruption Weaving together historical and ethnographic research this story challenges the master narratives of Puerto Rico as a tourist destination and site of natural disasters to demonstrate how fossil fuel economies are inextricably entwined with colonial practices and how local community groups in Puerto Rico have struggled against energy coloniality to mobilize and transform power from the ground up Catalina M de Onís documents how these groups work to decenter continental contexts and deconstruct damaging hierarchies that devalue and exploit rural coastal communities She highlights and collaborates with individuals who refuse the cruel logics of empire by imagining and implementing energy justice and other interconnected radical power transformations Diving deeply into energy islands and power this book engages various metaphors for alternative world making

Investigating Social Problems A. Javier Trevino, 2014-07-24 Given the complexity of the issues the study of social problems requires indeed demands specialized focus by experts A Javier Trevino Welcome to a new way of *Investigating Social Problems* In this groundbreaking new text general editor A Javier Trevino working with a panel of experts thoroughly examines all aspects of social problems providing a contemporary and authoritative introduction to the field Each chapter is written by a specialist on that particular topic This unique contributed format ensures that the research and examples provided are the most current and relevant in the field The chapters carefully

follow a model framework to ensure consistency across the entire text and provide continuity for the reader The text is framed around three major themes intersectionality the interplay of race ethnicity class and gender the global scope of many problems and how researchers take an evidence based approach to studying problems **At Nature's Edge** Gunnel Cederlöf, Mahesh Rangarajan, 2018-09-18 In an epoch when environmental issues make the headlines this is a work that goes beyond the everyday Ecologies as diverse as the Himalayas and the Indian Ocean coast the Negev desert and the former military bases of Vietnam or the Namib desert and the east African savannah all have in common a long time human presence and the many ways people have modified nature With research covering countries from Asia Africa and Australia the authors come together to ask how and why human impacts on nature have grown in scale and pace from a long pre history The chapters in this volume illumine specific patterns and responses across time going beyond an overt centring of the European experience The tapestry of life and the human reshaping of environments evoke both concern and hope making it vital to understand when why and how we came to this particular turn in the road Eschewing easy labels and questioning eurocentrism in today's climate vocabulary this is a volume that will stimulate rethinking among scholars and citizens alike

McKinnon, Robert Asen, Karma R. Chávez, Robert Glenn Howard, 2016-06-01 Rhetorical critics have long had a troubled relationship with method viewing it as at times opening up provocative avenues of inquiry and at other times as closing off paths toward meaningful engagement with texts Text Field shifts scholarly attention from this conflicted history looking instead to the growing number of scholars who are supplementing text based scholarship by venturing out into the field where rhetoric is produced enacted and consumed These field based practices involve observation ethnographic interviews and performance They are not intended to displace text based approaches rather they expand the idea of method by helping rhetorical scholars arrive at new and complementary answers to long standing

disciplinary questions about text context audience judgment and ethics The first volume in rhetoric and communication to directly address the relevance processes and implications of using field methods to augment traditional scholarship Text Field provides a framework for adapting these new tools to traditional rhetorical inquiry Aside from the editors the contributors are Roberta Chevrette Kathleen M de On s Danielle Endres Joshua P Ewalt Alina Haliliuc Aaron Hess Jamie Landau Michael Middleton Tiara R Na puti Jessy J Ohl Phaedra C Pezzullo Damien Smith Pfister Samantha Senda Cook Lisa Silvestri and Valerie Thatcher

Bombs Away David G. Havlick, 2018-04-11 When viewed from space the Korean Peninsula is crossed by a thin green ribbon On the ground its mix of dense vegetation and cleared borderlands serves as home to dozens of species that are extinct or endangered elsewhere on the peninsula This is Korea s demilitarized zone one of the most dangerous places on earth for humans and paradoxically one of the safest for wildlife Although this zone was not intentionally created for conservation across the globe hundreds of millions of acres of former military zones and bases are being converted to restoration areas refuges and conservation lands David G Havlick has traveled the world visiting these spaces of military to wildlife transition and in Bombs Away he explores both the challenges physical historical and cultural and fascinating ecological possibilities of military site conversions Looking at particular international sites of transition from Indiana s Big Oaks National Wildlife Refuge to Cold War remnants along the former Iron Curtain Havlick argues that these new frontiers of conservation must accomplish seemingly antithetical aims rebuilding and protecting ecosystems or restoring life while also commemorating the historical and cultural legacies of warfare and militarization Developing these ideas further he shows that despite the ecological devastation often wrought by military testing and training these activities need not be inconsistent with environmental goals and in some cases can even complement them a concept he calls ecological militarization A profound clear explication of landscapes both fraught and fecund marked by death but also reservoirs of life Bombs Away shows us how military activities conservation goals and ecological restoration efforts are made to work together to create new kinds of places and new conceptions of place

Advances in the Characterisation and Remediation of Sites Contaminated with Petroleum Hydrocarbons Jonás García-Rincón, Evangelos Gatsios, Robert J. Lenhard, Estella A. Atekwana, Ravi Naidu, 2023-11-22 This open access book synthesizes important advances in the assessment and management of soil and groundwater systems contaminated with petroleum hydrocarbons especially in the form of light non aqueous phase liquids LNAPLs LNAPL characterization and remediation is challenging due to the multi phase multi component nature of the problem and the various physical chemical and biological processes involved in a dynamic and heterogeneous hydrogeological setting This book focuses on the current state of practice of LNAPL characterization and remediation and seeks to provide information and a framework that would allow some of these complexities to be better addressed by contaminated land practitioners researchers and regulators
