Eco-Business Peter Dauvergne,Jane Lister,2013 Two experts explain the consequences for the planet when corporations use sustainability as a business tool McDonald s promises to use only beef coffee fish chicken and cooking oil obtained from sustainable sources Coca Cola promises to achieve water neutrality Unilever seeks to achieve 100 percent sustainable agricultural sourcing by 2020 Walmart has pledged to become carbon neutral Big brand companies seem to be making commitments that go beyond the usual greenwashing efforts undertaken largely for public relations purposes In Eco Business Peter Dauvergne and Jane Lister examine this new corporate embrace

of sustainability its actual accomplishments and the consequences for the environment For many leading brand companies these corporate sustainability efforts go deep reorienting central operations and extending through global supply chains Yet as Dauvergne and Lister point out these companies are doing this not for the good of the planet but for their own profits and market share in a volatile globalized economy They are using sustainability as a business tool Dauvergne and Lister show that the eco efficiencies achieved by big brand companies limit the potential for finding deeper solutions to pressing environmental problems and reinforce runaway consumption Eco business promotes the sustainability of big business not the sustainability of life on Earth
