The Chinese Water Dragon also known as the Asian Water Dragon or Green Water Dragon is a medium to large sized lizard that thrives in warm humid environments As their name suggests these reptiles are excellent swimmers and often spend a significant amount of time near water sources Their strong legs and long tails make them agile climbers and fast moving lizards both in trees and on the ground These lizards are known for their docile nature compared to other reptiles With regular handling and proper care Chinese Water Dragons can become quite tame and even enjoy interaction with their owners However they require a spacious and well maintained environment that replicates their natural habitat to thrive in captivity

Size Adult Chinese Water Dragons typically grow between 24 to 36 inches 60 to 90 cm in length with males being larger than females Their long tails account for nearly two thirds of their body length

Coloration Their vibrant green coloration helps them blend into their forest surroundings acting as natural camouflage Some individuals may display hints of blue or yellow

Tail and Limbs Their tails are prehensile and serve as a defense mechanism while their strong limbs allow them to climb trees and escape predators

Crest and Spikes Males tend to have more prominent crests and spikes running down their backs and tails which they use for display and dominance
