Islamic Desk Reference E. J. Van Donzel, 1994-01-01 The growing demand for concise and factual information about the history and culture of Islam has now been met with the Islamic Desk Reference This handy one volume work contains a condensation of the subject matter of The Encyclopaedia of Islam the most prestigious and valuable reference work for Islamic studies published this century In a brief orderly and intelligible form the Islamic Desk Reference provides thus a unique and valuable quick reference tool for those interested in the religion the believers and the countries of the Islamic world All entries in the Islamic Desk Reference are given in English Thus names of Arabic origin which in the West were corrupted to another spelling e g Ibn Sina to Avicenna al Kuhl to alcohol are found under the latter term The Islamic Desk Reference contains maps diagrams and genealogical tables for easy reference and illustrations Islam Jacques Waardenburg, 2008-08-22 This book presents some twenty essays on different aspects of Islam in history and the present These essays are grouped into eight larger sections The first The Beginnings deals with the transition from pre Islamic understandings and reason an essential part of the Quranic message The next two sections deal with Islam specifically as a religion with its particular signs and symbols The question of rules of interpretation in Islam and its structural features is discussed here Sections four and five deal with ethics in Islam including Muslim identity and human rights and certain social functions of Islam Section six introduces some 19th and 20th century reform movements with special attention given to developments in Saudi Arabia and the puritan characteristics of present day Islamic revival movements The final two sections discuss contemporary issues Islamization processes and policies Islamic ideologies the ideologization of Islam and the political uses of religion Throughout the book the author shows the links between the religious and other interpretations and uses made of Islam and the contexts in which they are made The Introduction signals some important developments in Islamic studies since World War II The Penguin Dictionary of Islam Azim Nanji, 2008-04-24 Islam today is a truly global faith yet it remains somewhat of an enigma to many of us Each and every day our newspapers are saturated with references to Islam Quran Taliban Hijab Fatwa Allah Sunni Jihad Shia the list goes on But how much do we really understand Are we in

fact misunderstanding The Penguin Dictionary of Islam provides complete impartial answers It includes extensive coverage of the historical formations of the worldwide Muslim community and highlights key modern Muslim figures and events Understanding Islam is vital to understanding our world and this text is the definitive authority designed for both general and academic readers **The Encyclopaedia of Islam** ,1998 *Theological Foundations* John J. Mueller,2007 Here a team of award winning teaching scholars has come together to create an introductory text that offers a truly unique and innovative contribution to the discipline of theological studies This first book provides students of any religious tradition with the foundational skills vocabulary conceptual understanding and research abilities that they need to succeed in theology and religious studies *Theological Foundations* provides the following Ten chapters that introduce the major sub disciplines of theology creating a well rounded source for understanding the discipline as a whole Contributions that are clear accessible and steeped in content A strong basis for vigorous intellectual and personal exploration of life and our relation to God Flexibility that allows the instructor to assign readings in any order that fits his or her syllabus A one of a kind integrated library research component From the Reference Librarian which teaches students the foundational skills needed for successful study in theology and in any academic discipline **The Muslim Discovery of America** Frederick William Dame,2013 Some so called authorities claim that Muslims came to America hundreds of years before Columbus arrived in the New World Are the claims true Columbus expedition represents the first major discovery of the Americas and the first appearance of non Native Americans The conventional wisdom is that Columbus ended tens of thousands of years of near total isolation for the Native Americans Since the Americas had been initially populated probably between 13 000 BC and 11 000 BC there had been no engagement with peoples from any other continent save small ventures by the Norse into Northeastern Canada Did Muslims come to the Americas possibly as early as the 700s These researchers argue that Muslims came from Islamic Spain particularly the port of Delba Pelos during the rule of Caliph Abdullah Ibn Mohammed 888 912 A Muslim historian Abul Hassan Al Masudi c 895 957 added a map of the world to his book one that contained a large area in the ocean of darkness and fog the Atlantic ocean which he referred to as the unknown territory the Americas This book demonstrates that this assertion is important for Muslims because in conjunction with the relevant verses from the Koran and quotes from Mohammed it establishes the claim of Muslims that Allah intended America to be Islamic The book also investigates the lives of selected Muslims in America and organizations from the eighteenth century into the twenty first century It reveals that there was nothing more than a continuation of typical Islamic deception and subversive jihad It also documents the lie of the Islamic claim that hundreds of place names in the United States of America and Canada derive from Arabic Islamic roots Finally the book exposes the rewriting of American history by Islamic and pro Islamic media This book is alarming informative interesting and true [For the Love of Husayn \(AS\)](#) Muhammad-Reza Fakhr-Rohani,2012-12-01 This book is a compilation of different poems composed in memory of the Master of Martyrs Husayn ibn Ali AS and his loyal

companions who were martyred almost 14 centuries ago in Karbala Iraq A chorus of poets from different parts of the world have sung the praises of the heroes of the greatest act of sacrifice in human history the Battle of Karbala and this book reflects only a glimpse of such songs of praise sorrow and mourning The Sciences in Islamicate Societies in Context Sonja Brentjes,2023-11-30 This Variorum volume reprints ten papers on contextual elements of the so called ancient sciences in Islamicate societies between the thirteenth and the seventeenth centuries They address four major themes the ancient sciences in educational institutions courtly patronage of science the role of the astral and other sciences in the Mamluk sultanate and narratives about knowledge The main arguments are directed against the then dominant historiographical claims about the exclusion of the ancient sciences from the madrasa and cognate educational institutes the suppression of philosophy and other ancient sciences in Damascus after 1229 the limited role of the new experts for timekeeping in the educational and professional exercise of this science and the marginal impact of astrology under Mamluk rule It is shown that the muwaqqits timekeepers were important teachers at madrasas and Sufi convents that Mamluk officers sought out astrologers for counselling and that narratives about knowledge reveal important information about scholarly debates and beliefs Colophons and dedications are used to prove that courtly patronage for the ancient sciences continued uninterrupted until the end of the seventeenth century Furthermore these papers refute the idea of a continued and strong conflict between the ancient and modern sciences showing rather shifting alliances between various of them and their regrouping in the classifications of the entire disciplinary edifice These papers are suited for graduate teaching in the history of science and the intellectual cultural and social history of the Middle East and for all readers interested in the study of the contexts of the sciences *Mystical Power and Politics on the Swahili Coast* Nathalie Arnold Koenings,Nathalie Arnold,2024 Traces changing visions of mystical power and authority on the island of Pemba whose people s reputed resistance to outside rule has shaped the national narratives of both Zanzibar and Tanzania For two centuries Pemba the second largest island of Zanzibar has been known by East Africans and outsiders alike as rich in dangerous knowledge Despite Pembans reputation for piety and deep Islamic knowledge uchawi mystical work and power sometimes termed magic witchcraft or sorcery has long featured in diverse visions of their identity and as key to worldly power Today as traditional methods of securing agency are called into question and new ways proliferate the mystical world is an intensely conflicted realm where the nature of power ethical action and reality itself is continually reframed This luminous ethnography follows Pemban notions of invisible and worldly power through the Zanzibar Revolution of 1964 the trials of multiparty democracy the rise of Islamic revival and intensifying neoliberalism Through an exploration of rural imaginings of power it argues that nations and the grammars that underwrite them are made in and by their peripheries which give the centre shape Highlighting the intersections of mystical practices religion and politics as such on the Swahili Coast the book contributes new perspectives to studies of the imagination power and religious transformation in Africa the Indian Ocean and the larger Islamic world **Exotic Animals**

in the Art and Culture of the Medici Court in Florence Angelica Groom, 2018-10-22 The book examines the roles that rare and exotic animals played in the cultural self fashioning and the political imaging of the Medici court during the family's reign first as Dukes of Florence 1532-1569 and subsequently as Grand Dukes of Tuscany 1569-1737 The book opens with an examination of global practices in zoological collecting and cultural uses of animals The Medici's activities as collectors of exotic species the menageries they established and their deployment of animals in the ceremonial life of the court and in their art are examined in relation to this wider global perspective The book seeks to nuance the myth promoted by the Medici themselves that theirs was the most successful princely *serraglio* in early modern Europe *Recent Reference Books in Religion* William M.
