**Administrative System Innovation and Building a Public Service-Oriented Government** Marc Holzer, Wei Hu, Mengzhong Zhang, 2019-11-15 From the late 1970s until the present day the New Public Management movement flourished in the United Kingdom New Zealand Australia and a number of other countries over the globe Nowadays governments across the world are more service oriented than previously and administrative system innovations are encouraging new ways of improving public services Increasingly more and more countries are witnessing administrative innovations to provide better quicker and more efficient and effective service to the public To this end this collection of essays highlights public service theory and practices While some chapters concentrate on

innovation in administrative systems others pay attention to more theoretic and practical issues A few examine municipal level public service and innovation whereas others focus on environment community policing public infrastructure partnership governance and e service and e participation as well as citizen participation The book represents an excellent updated resource for scholars students and practitioners in the broad field of public administration public policy public affairs and public management     *European Journal of Tourism Research* ,2019-11-22 The European Journal of Tourism Research is an open access academic journal in the field of tourism published by Varna University of Management Bulgaria Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism Publications from all fields connected with tourism such as tourism management tourism marketing tourism sociology psychology in tourism tourism geography political sciences in tourism mathematics tourism statistics tourism anthropology culture and tourism heritage and tourism national identity and tourism information technologies in tourism and others are invited The journal is open to all researchers Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words Major research articles of between 10 000 and 20 000 are highly welcome Longer or shorter papers will also be considered The journal publishes also Research Notes of 1 500 2 000 words Submitted papers must combine theoretical concepts with practical applications or empirical testing The European Journal of Tourism Research includes also the following sections Book Reviews announcements for Conferences and Seminars abstracts of successfully defended Doctoral Dissertations in Tourism case studies of Tourism Best Practices The European Journal of Tourism Research is published in three Volumes per year There are no charges for publication The full text of the European Journal of Tourism Research is available in the following databases EBSCO Hospitality and Tourism Complete CABI Leisure Recreation and Tourism ProQuest Research Library The journal is indexed in Scopus and Clarivate Analytics Emerging Sources Citation Index The editorial team welcomes your submissions to the European Journal of Tourism Research     **Proceedings of the 2nd**

**International Conference on Democracy and Social Transformation (ICON-DEMOST 2023)** Naili Ni'matul Illiyyun,Endang Supriadi,Ririh Megah Safitri,Masrohatun Masrohatun,2024-01-05 This is an open access book Faculty of Social and Political Science State Islamic University Walisongo Semarang has been playing significant roles in building global peace and justice by conducting scientific research and creating a space for academic dialogue and discussion This goal is in line with our vision to be a Research Faculty based on the unity of sciences for humanity and civilization As part of the efforts to create a space for academic dialogue at a global level we organize an international conference which aims to develop scientific knowledge build institutional capacity and strengthen international networking The conference is also held to support State Islamic University Walisongo Semarang in achieving its vision to be an Islamic world class university The conference raises the issue of democracy and social transformation to capture the social and political dynamics The selection

of this topic is based on the idea that technological development is becoming a crucial issue within modern society in which people tend to experience alienation within the rapid social and political transformation. Democracy as a political system that ensures transparency, citizen participation and human rights protection is now under threat. Having the fact that there is a growing tendency of using transactional politics to win political interests such as the use of money and identity in political processes, therefore political analysts consider this situation as the regression of democracy. Rapid social and cultural transformation as a consequence of advanced technology creates problems in modern society. On one hand, technology has made the life of people easier. However, on the other hand, the sense of humanity's values and principles is declining. This situation can be observed in the decrease in social solidarity and the rise of individualism. Modernity that values productivity and economic growth has brought a negative impact on the life of human being and nature. The exploitative character of industrialization has created an ecological crisis. Advanced information technology has loosened social cohesivity and the rise of instrumental rationality has removed local genius or local wisdom from the life of society. Since the ultimate goal of humanity is respecting the dignity of human beings, hence bringing back humanity to the center of the development program is crucial, especially in the current social and political dynamics. In the political context, humanity means respecting the basic rights of the citizen and putting them as a subject of political development and not perceiving citizens as only an instrument to win political power. Based on the above background, this conference is organized. The overall goal of the conference is to mainstream humanity in the current social and political change. The conference is also expected to be an arena for scholars and experts in social and political science as well as practitioners and policymakers to meet and exchange ideas and perspectives for a better future of our society.

*After-sales Service of Engineering Industrial Assets* Vicente González-Prida Díaz, Adolfo Crespo Márquez, 2014-01-10. This book explores the practical implementation of an advanced after sales management framework devoted to warranty management. The framework is intended for companies producing either standardized or customized products and such a management tool will facilitate organizational improvement and support innovative decision making processes for technical assistance in after sales services. After sales Service of Engineering Industrial Assets comprises a proposal for a warranty management framework with an account of the different methods that can be used to improve decision making in the different stages of the after sales service management process and strategies for strengthening the structure and foundations of the framework. A review of the fundamental issues and current research topics in warranty management and after sales services is also provided which is exemplified by a case study. This book is intended for postgraduates, researchers and engineers who are interested in after sales management, assets engineering and warranty management.

**Lean Management System LMS:2012** William A. Levinson, 2017-07-27. The success of a Lean manufacturing program depends far more on organization wide leverage of Lean manufacturing tools than it does on the tools themselves. To this, the organization must add the human relations aspects that earn buy in and engagement by all.

members of the workforce to the extent that workers will react immediately and decisively to the presence of waste The synergy of the human and technological aspects of Lean form what Henry Ford called a universal code for the achievement of world class results in any enterprise and which he put into practice to deliver unprecedented bottom line results This book expands upon and systemizes this universal code into a structure or framework that promotes organizational self audits and continuous improvement The book s first section offers a foundation of four simple but comprehensive Lean key performance indicators KPIs waste of the time of things as in cycle time waste of the time of people waste of energy and waste of materials The Toyota Production System s seven wastes are all measurable in terms of these four KPIs which also cover the key metrics of Eliyahu Goldratt s theory of constraints throughput inventory and operating expense The first section then adds a proactive improvement cycle that sets out to look for trouble by isolating processes for analytical purposes and measuring and then balancing inputs and outputs to force all wastes to become visible It is in fact technically impossible for any waste of material or energy to hide from what chemical engineers call a material and energy balance Application of this book s content should therefore satisfy most provisions of the ISO 14001 environmental management system standard and the new ISO 50001 energy management system standard The second section consists of an unofficial and therefore customizable standard against which the organization

*Manufacturing System Throughput Excellence* Herman Tang, 2024-07-08

Improve key metrics of manufacturing performance with this accessible guide Manufacturing throughput refers to the quantity of products that can be produced within a period and with available resources Enhancing manufacturing throughput is crucial for a business s success However managing and improving throughput can be challenging due to the complexity of manufacturing systems and their operations which involve numerous variables To effectively manage and improve system throughput it is essential to adopt a scientifically guided methodology and practices Manufacturing System Throughput Excellence is a unique book that provides a concise and practical overview of manufacturing throughput management It includes best practices for achieving improved throughput on the production floor and explores the connections between production management and system design The book emphasizes practical executable approaches drawing on the author s 25 years of industry and academic experience It serves as an indispensable tool for businesses looking to boost manufacturing efficiency and drive improved outcomes Manufacturing System Throughput Excellence readers will discover The latest and effective approaches for achieving manufacturing operational excellence Key pillars of manufacturing excellence production management maintenance management quality management and system design Specific principles and methods on bottleneck identification and buffer analysis Insightful connections between academic research and industrial practice Summaries and end of chapter exercises to reinforce learning Manufacturing System Throughput Excellence is a unique and comprehensive guide for manufacturing practitioners and researchers as well as mechanical and industrial engineering students in advanced manufacturing courses
