Literatures in the Digital Era Dolores Romero, Amelia Sanz, 2009-03-26 The application of technology to information communication and culture has been through the history of humanity a key factor in social progress and well being

Literatures in the Digital Era Theory and Praxis analyses in its twenty chapters the impacts of digital technology for the contemporary culture The literary system is being powerfully affected in three aspects In the first place computer resources have been used to preserve and edit literary texts associating to them graphical material links with related texts or with dictionaries and above all developing search tools of concordance and syntactic semantic analysis Secondly we are watching

the birth of a digital literature with new generic characteristics new creators with knowledge of both technological mechanisms and literary resources and a reader capable of interpreting and enjoying texts on the screen Thirdly literary theory has expressed new postulates with regard to the multiple authorship of digital texts the disintegration of the textual meaning the intertextuality and implications of the reader in the creation process and the interpretation of the texts These three impacts imply for some authors the search of a new paradigm for the creation reading and interpretation of digital texts which points to a new humanism Bridge Over the Tampere Rapids and Other Finnish Stories Ernest Hekkanen,1979
