Traffic and Transport Psychology Geoffrey Underwood, 2005-06-09 Just as our transport systems become more and more important to our economic and social well being so they become more and more crowded and more at risk from congestion disruption and collapse Technology and engineering can provide part of the solution but the complete solution will need to take account of the behaviour of the users of the transport networks The role of psychologists in this is to understand how people make decisions about the alternative modes of transport and about the alternative routes to their destinations to understand how novice and other vulnerable users can develop safe and effective behaviours how competent users can operate within the transport system optimally and within their perceptual and cognitive limitations The contributions to this volume address these issues of how the use of our transport systems can be improved by taking into account knowledge of the behaviour of the people who use the systems Topics discussed include driver training and licensing driver impairment road user attitudes and behaviour enforcement and behaviour change driver support systems and the psychology of mobility and transport mode choice This work will be of value not only to psychologists but to all transport professionals interested in the application of psychology to traffic

La communication organisationnelle en débat Collectif, Christian Le Moëne, 2001-01-20 Depuis une vingtaine d'années on observe la montée en puissance de la communication interne et externe des organisations privées et publiques en liaison notamment avec l'implantation croissante des technologies de l'information. En même temps ce phénomène s'accompagne du développement important de l'ingénierie sociale ce qui a pour effet d'accroître la diffusion des innovations organisationnelles et de remettre en question les normes, les procédures, les dispositifs organisationnels ainsi que les relations de travail. Cette évolution du champ professionnel qui interroge nombre d'acteurs individuels et collectifs est désormais largement étudiée par les sciences humaines et sociales dans des perspectives tant disciplinaires (sociologie, gestion, économie, psychologie sociale) tant transversales. Cette livraison anniversaire de Sciences de la Société numérotée double se propose de faire le point sur un certain nombre de débats nouveaux ou récurrents qui traversent ce champ scientifique en voie de constitution et de présenter un état provisoire des recherches, des questionnements et des problématiques dans quelques domaines clés de la communication organisationnelle.

French and Other Perspectives in Praxiology Wojciech W. Gasparski, 2018-01-18 Volume 12 in this distinguished series explores current topics in praxiology as studied in France and elsewhere. As is characteristic of contemporary praxiology contributors both investigate new topics and use new methods to re-examine older approaches. Part 1 is composed of three sections by French scholars. These deal with humans as a subject of action as well as a subject of knowledge. In respecting the particular domains of psychology and praxiology they demonstrate how they converge to shed light on the human being as an individual or as part of a group. The first section discusses relations between individual action and collective action while the second section is concerned with relations between the act, objects and space and explores work spaces, production spaces, office spaces and social spaces. The third section examines relations between action and cognition, a domain considered to be little understood in general. Finally the role of mathematics in decision making is discussed as a determinate of the praxiological process. The second part is composed of contributions by scholars from Finland, Great Britain, Poland, Portugal, Spain and the United States. The topics are how praxiology helps economists understand cooperative actions and related issues of different responsibilities; how and to what extent university education creates conditions for competitive advantage in the countries of Central and Eastern Europe; and how problems of corporate governance are approached in the region; how innovation influences competence in the region of established economy in Spain; and how information systems constitute a multi-agent system. Finally a formal analysis of praxiological dimensions in light of the fuzzy logic approach is discussed.

Environmental and Sustainability Education in Francophone Europe Alain Pache, Anne Glaudel, Christine Partoune, 2025-02-12 This book presents eleven contributions illustrating the main areas of research in French speaking Europe in the field of environmental and sustainability education (ESE). It argues that although research in the field of ESE is well established it is not yet structured at a national level, whether in France, Belgium or Switzerland. The main issues

addressed by the contributors are presented with a view to establishing a dialogue with the Anglophone community Three avenues are identified i exploring the place of ESE in education systems in terms of a continuum of education ii exploring the specificities of ESE teaching practices and iii exploring teacher education and training practices The contributions suggest a number of courses of action and prospects for encouraging debate between both researchers and language communities ranging from collaboration and shared research programmes to a reworking of educational concepts and practices and initial and continuing professional development in relation to pressing pedagogical social and environmental challenges This volume will be a key resource for educators policymakers scholars and advanced students of environmental and sustainability education and teacher education and training It was originally published as a special issue of Environmental Education Research

Incentives and Environmental Policies Benjamin Ouvrard, Anne Stenger, 2019-03-04 The economic protection of the quality of the environment took shape properly in the middle of the 20th Century when various economic instruments were proposed to policymakers Today protecting the environment is essential as evidenced in the rise in temperatures the melting of the icecaps the disappearance of animal species etc Moreover with recent advances in other disciplines notably in psychology economists are turning more and more towards non monetary forms of incentive However questions concerning the effectiveness of these forms arise *Incentives and Environmental Policies* deals with the role of the economy in protecting the environment by revisiting traditional economic instruments and pursuing an advanced consideration of the role of new forms of incentive It appears that in order to strive towards the best possible environmental quality policymakers will have to take into account the future of many combinations of socially acceptable incentives

Cooperative Contextual Change Biscaccianti,Williams,Esposito,2011-05 Alessandro Biscaccianti Mark Esposito and Lloyd C Williams have come together to write a modern new textbook on the theory of contextual change presenting original ideas tested and ready to implement in their highly informative book *The M3C Model of Cooperative Contextual Change* The authors posit that to increase effectiveness of change it s necessary to introduce dynamic stability into a system The whole organization and each individual should have a sense of security and M3C can become the vehicle for this change One especially new element is the contextual drivership method which integrates leadership and management into organizational practices and processes that assure opportunity and capacity for success among employees So if you re ready to increase action coordination proactively anticipate possible issues enhance information sharing and become willing to look for solutions instead of focusing on problems pick up*The M3C Model of Cooperative Contextual Change*for some brand new insight Risks and the Anthropocene Julien Rebotier,2022-02-15 The Anthropocene refers to all societies current era of

Representation of the Banlieusard in Literature, Cinema, and Performances Emma Chebinou, 2024-09-05 Representation of the Banlieusard in Literature Cinema and Performances Francephobia explores the complex identity of the banlieusard within French society through literature film and pop culture such as rap music and stand up comedy The banlieue known in English as the inner city is home to underrepresented and marginalized descendants of North and West African immigrants as well as some white European immigrants or white French individuals Established in tall housing estates located on the wider outskirts of Paris the banlieue is a space constructed through the systemic disenfranchisement of working class people across genders ethnicities and race and through associations with crime unemployment poverty etc In face of these challenges the banlieusard e attempts to claim their Frenchness but finds oneself trapped by society s negative perception Similarly they are also physically trapped in their space of high rise buildings and in a social economic sphere with preconceived beliefs making it difficult to integrate and contribute to French society This book aims to emphasize resistance and the agency of the banlieusard e rather than pointing out their marginalization by society s preconceptions Therefore the spatial arrangement of the projects where they live redefines deconstructs reconstructs and reverses the center periphery dichotomy in which the center becomes the banlieue and as a result its outcast status is diminished Through a varied selection of novels films rap and stand up comedy Emma Chebinou exposes the necessity in examining negative stigmas created by the institutional discourse and by space and gives a broader interpretation of the banlieue
