

Module 11 Study Guide

Instructions: Use this document as a guide as you take notes while you complete this week's module. Answering the questions as you complete the module will help you as you complete the exams throughout the semester.

Chapter 10 Myers & Twenge

Note that these are things covered ONLY in the text. Many items in the text are also covered in the videos so please refer to both when completing this guide.

1. Explain the biological influences on aggression.

Gender, neural influences, genetic influences, biochemical influences (such as alcohol and drugs), diet, testosterone and serotonin.

2. Describe the frustration-aggression theory and define and recognize examples of relative deprivation.

Frustration-aggression theory: the theory that frustration triggers a readiness to aggress. An example of this theory is in a study where students who lost a multiplayer game blasted their opponents with longer and louder bursts of noise.

3. Explain the effects of the following on aggression: heat, alcohol, testosterone, genetics, & pain.

Higher heat, more alcohol consumption, higher testosterone and higher pain are factors that can increase aggression. Having genetic predispositions to being aggressive (such as having a parent who was a convicted murderer or abuser) is another factor that can increase aggression.

4. Explain how aggression is reduced and describe the effect of catharsis on aggression.

Aggression can be reduced by using "I" statements and allowing out anger to be heard in an assertive and not aggressive manner. Learning problem solving skills, emotional control and conflict resolution are also helpful for reducing aggression.

Catharsis causes aggression and anger to increase and have happiness levels decrease.

Aggression: Mini Lecture

1. Define the following terms and recognize examples of each: aggression, hostile aggression, instrumental aggression, social aggression, and physical aggression.

Aggression: physical or verbal behavior intended to hurt someone.

Hostile aggression: "hot", this aggression is impulsive and angry, the goal of it is to injure somebody. Example: you walk in on your girlfriend cheating on you and you impulsively want to hurt them.

Instrumental aggression: "cool", this aggression is premeditated, the goal of it is injury as a means to an end. Example: terrorist attacks, many people are injured but the goal is not just to harm people, the goal is to instill fear amongst a large group of people or a population. Another example is pirates on the open seas, they often do hurt people on the ships, but the real goal is to take the money or products on the ship.
