including categorical programs poverty targeted programs labor benefits and services disability benefits and services and social services The Sourcebook seeks to address concrete how to questions including How do countries deliver social protection benefits and services How do they do so effectively and efficiently How do they ensure dynamic inclusion especially for the most vulnerable and needy How do they promote better coordination and integration not only among social protection programs but also among programs in other parts of government How can they meet the needs of their intended populations and provide a better client experience The delivery systems framework elaborates on the key elements of that operating environment The framework is anchored in core implementation phases along the delivery chain Key actors including people and institutions interact all along that delivery chain Those interactions are facilitated by communications information systems and technology This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection The Sourcebook structures itself around eight key principles that can frame the delivery systems mind set

- 1 There is no single blueprint for delivery systems but there are commonalities and those common elements constitute the core of the delivery systems framework
- 2 Quality of implementation matters and weaknesses in any of the core elements will negatively affect the entire system reducing the impacts of the program s they support
- 3 Delivery systems evolve over time in a nonlinear fashion and their starting points matter
- 4 Efforts should be made to keep it simple and to do simple well from the start
- 5 The first mile people s direct interface with administrative functions is often the weakest link in the delivery chain improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines
- 6 Social protection programs do not operate in a vacuum and thus their delivery systems should not be developed in silos synergies across institutions and information systems are possible and can improve program outcomes
- 7 Social protection delivery systems can contribute more broadly to government s ability to serve other sectors such as health insurance subsidies scholarships social energy tariffs housing benefits and legal services
- 8 The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems through a dynamic integrated and human centered approach

Boardroom Behaviour and the Law Samet Caliskan, Pereowei Subai, 2025-03-28 This book examines how various areas of law collectively influence the relationship between a company and its directors particularly in safeguarding the long term interests of stakeholders Directors inappropriate actions can expose a company to significant corporate risks particularly in relation to regulatory violations such as breaches of competition law When directors engage in such misconduct company law and corporate governance provide certain control mechanisms that allow the company to manage these risks Additionally directors can be discouraged from engaging in such behaviour by the threat of being held accountable for violations of competition law This book evaluates various tools designed to regulate directors behaviours and ensure accountability questioning whether the legal frameworks strike the right balance between corporate liability and personal accountability It argues that these mechanisms do not sufficiently protect the long term interests of stakeholders and that shortcomings in the law leave companies vulnerable to directors misconduct which cannot be adequately addressed through traditional risk management strategies This book will be of interest to researchers in the field of corporate law competition law and corporate governance
