MICCAI 2010 Tianzi Jiang, Nassir Navab, Josien P.W. Pluim, Max A. Viergever, 2010-09-21

The 13th International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2010 was held in Beijing China from 20-24 September 2010. The venue was the China National Convention Center (CNCC) China, the largest and newest conference center with excellent facilities and a prime location in the heart of the Olympic Green adjacent to characteristic constructions like the Bird's Nest National Stadium and the Water Cube National Aquatics Center. MICCAI is the foremost international scientific event in the field of medical image computing and computer assisted interventions. The annual conference has a high scientific standard by virtue of the threshold for acceptance and accordingly MICCAI has built up a track record of attracting leading scientists, engineers and clinicians from a wider range of technical and biomedical disciplines. This year we received 786 submissions well in line with the previous two conferences in New York and London. Three program chairs and a program committee of 31 scientists all with a recognized standing in the field of the conference were responsible for the selection of the papers. The review process was set up such that each paper was considered by the three program chairs, two program committee members and a minimum of three external reviewers. The review process was double blind so the reviewers did not know the identity of the authors of the submission. After a careful evaluation procedure in which all controversial and gray area papers were discussed individually we arrived at a total of 251 accepted papers for MICCAI 2010 of which 45 were selected for podium presentation and 206 for poster presentation. The acceptance percentage 32% was in keeping with that of previous MICCAI conferences. All 251 papers are included in the three MICCAI 2010 LNCS volumes.

Spasticity, Second Edition Allison Brashear, 2015-12-09. Since publication of the first edition *Spasticity: Diagnosis and Management* has been the defining reference and go to source for physicians, therapists and other healthcare providers who care for patients with spasticity. For this new updated edition Dr Brashear and a diverse team of specialists have come together to integrate new research, clinical trials, measurement tools, therapies and other recent advances that reflect this evolving field. The book is organized into four sections each of which covers a broad scope of material. The first is a general overview of spasticity and its effects on movement in patients. Other chapters cover epidemiology and ancillary findings commonly associated with spasticity. Part II details assessment tools and measurements, treatment goals and how to aim for realistic outcomes. Part III outlines various treatment modalities including heavily updated chapters on the use of botulinum toxin in the upper and lower extremities, guidance techniques for injections, intrathecal baclofen, neuromodulation, surgery, physical therapy and more. The last section which contains several new chapters discusses evaluation of outcomes and management of patients with stroke, traumatic brain injury, spinal cord injuries, multiple sclerosis, cerebral palsy and cancer followed by chapters on spasticity management in long term care facilities and economic considerations. This book remains the most comprehensive guide to diagnosis and management of spasticity in adults and children and the revised second edition will continue to serve as an invaluable resource for professionals in any discipline who strive to provide quality care.

to spasticity patients Key Features Revised edition of the premier clinical reference on spasticity Incorporates the latest advances in assessment and treatment Contains six entirely new chapters highlighting key topics including Tardieu scale and other measurement tools ultrasound guidance for botulinum toxin management spasticity in special populations emerging therapies and economic impact More than 200 figures and 70 tables accompany the updated text
