Monthly Catalog of United States Government Publications , **The Prince of Silicon Valley** Randall Smith,2010-01-19 RISE FALL AND RETURN The Prince of Silicon Valley traces the rise of the foremost investment banker of the Internet stock market bubble from the back streets of South Philadelphia to the peak of finance as the highest paid banker on Wall Street From Cisco to Netscape to Amazon Frank Quattrone took some of the biggest names in technology public During the bubble years of 1999 and 2000 his California based technology banking group led the most hot initial public offerings which lifted the entire stock market to record heights But after the bubble burst the hot stocks cooled and ordinary investors lost billions It emerged that brokers in Quattrone s firm had created lucrative investment accounts stuffed with hot IPOs for banking clients who became known as Friends of Frank Some of the brokers regulators charged cut off other investors who refused to pay back a share of their IPO profits And so Quattrone and his firm became embroiled in no less than four different investigations of bubble related misconduct culminating in two criminal trials against Quattrone for obstruction of justice the first resulting in a mistrial the second in a conviction in 2004 After his conviction was overturned by an appeals court in 2006 Quattrone returned in triumph to the banking business advising no less than Internet search giant Google on corporate strategy But the story of his fall from grace however temporary remains a cautionary tale of ambition gone wrong of a Wall Street Icarus who flew too close to the sun The Prince of Silicon Valley is an absorbing noir detective story of the investigations and trials that brought him to the brink of disaster **Historical Tables, Budget of the United States Government** United States. Kettl,2011-07-01 In the flush of enthusiasm to make government work better reformers from both left and right have urged government to turn as many functions as possible over to the private sector and to allow market competition instill efficiency and choice In fact government has been doing just this for years every major policy initiative launched since World War II has been managed by public private partnerships Yet such privatization has not solved government s problems While there have been some positive results thee

has been far less success than advocates of market competition have promised In a searching examination of why the competition prescription has not worked well Donald F Kettl finds that government has largely been a poor judge of private markets Because government rarely operates in truly competitive markets contracting out has not so much solved the problems of inefficiency but has aggravated them Government has often not proved to be an intelligent consumer of the goods and services it has purchased Kettl provides specific recommendations as to how government can become a smart buyer knowing what it wants and judging better what it has bought Through detailed case studies Kettl shows that as market imperfections increase so do problems in governance and management He examines the A 76 program for buying goods and services the FTS 2000 telecommunications system the Superfund program the Department of Energy's production of nuclear weapons and contracting out by state and local governments He argues that government must be more aggressive in managing contracts if it is to build successful partnerships with outside contractors Kettl maintains that the answer is not more government but a smarter one which requires strong political leadership to refocus the bureaucracy's mission and to change the bureaucratic culture
