

MMI Interview Practice Questions and Answers

Healthcare Questions - Answer

"Healthcare" - there's an app for that - Answer Question is asking about the affects of technology on healthcare

Pros:

→ Helps to connect doctors with patient information. Talk about the elderly man coming in with different prescriptions from a rheumatologist, cardiologist, physiatrist, and general practioner. The medications taken together would have harmed him. A side note is that he did not have a family doctor so, he did not have that figure that was aware of all his conditions and history. But technology can help because files are electronic (electronic medical records) and a can be passed along much more easily. GAGE PATIENTS COMFORT LEVEL AND PLAN ACCORDINGLY

→ My mom is a project manager who helped develop a feature in the walk in clinic websites that lets patients know the wait time. I think this is huge, because I've spent hours in waiting in those clinics.

→ I had to go for blood testing recently and now you can book appointments online, which also decreases time spent in the waiting room.

→ Kroll computer system used in pharmacy - makes it quick and easy to look up patient information.

Cons

→ Issues with older generations not being so keen on technology (I worked in a pharmacy in a community called Oak Bay on the island which was predominantly elderly individuals). Confusion with "fancy" blood pressure machines. "Generational gap", have to make sure we take this into consideration.

→ Is important to not become over reliant on technology and to keep the human touch. Machines break, applications can give inaccurate information, systems can glitch. Important to make sure that we would never be incompetent if we had to function in the absence of technology. Lack of privacy also computer viruses. Ransomware.
