Erling,John Clegg,Casmir M. Rubagumya,Colin Reilly,2021-07-01 This edited collection provides unprecedented insight into the emerging field of multilingual education in Sub Saharan Africa SSA Multilingual education is claimed to have many benefits amongst which are that it can improve both content and language learning especially for learners who may have low ability in the medium of instruction and are consequently struggling to learn The book represents a range of Sub Saharan school contexts and describes how multilingual strategies have been developed and implemented within them to support the learning of content and language It looks at multilingual learning from several points of view including translanguaging or the use of multiple languages and especially African languages for learning and language supportive pedagogy or the implementation of a distinct pedagogy to support learners working through the medium of a second language The book puts forward strategies for creating materials classroom environments and teacher education programmes which support the use

of all of a student's languages to improve language and content learning. The contexts which the book describes are challenging, including low school resourcing, poverty, and low literacy in the home and school policy which militates against the use of African languages in school. The volume also draws on multilingual education approaches which have been successfully carried out in higher resource countries and lend themselves to being adapted for use in SSA. It shows how multilingual learning can bring about transformation in education and provides inspiration for how these strategies might spread and be further developed to improve learning in schools in SSA and beyond. Research in Education, 1974 The Palgrave Handbook of Textbook Studies Eckhardt Fuchs, Annekatrin Bock, 2018-04-04. This volume examines the present status and future trends of textbook studies. Cutting edge essays by leading experts and emerging scholars explore the field's theories, methodologies, and topics with the goal of generating debate and providing new perspectives. The Georg Eckert Institute's unique transdisciplinary focus on international textbook research has shaped this handbook which explores the history of the discipline, the production processes and contexts that influence textbooks, the concepts they incorporate, how this medium itself is received, and future trends. The book maps and discusses approaches based in cultural studies as well as in the social and educational sciences, in addition to contemporary methodologies used in the field. The book aims to become the central interdisciplinary reference for textbook researchers, students, and educational practitioners.
