contains synopses of these two proposals as well as applications of these to a variety of linguistic phenomena Further articles provide detailed analyses of a range of semantic and pragmatic categories and their morphosyntactic expression in a wide variety of languages The articles in this book contain data on some 60 different languages including focused articles on phenomena in Arabic Danish English Lengua de Se as Espa ola Mapudungun Plains Cree and Tanggu In all the contributions to this volume show that the issue of morphosyntactic expression in Functional Grammar is very much alive and moving into promising new directions while at the same time contributing to a better understanding of a large number of morphosyntactic phenomena in a wide variety of languages
